# TABLE OF CONTENTS

---

CHAPTER 1: Course Design .....	1
1.1. General Principles.....	1
1.1.1. Safety...	..1
1.1.2. Quality ...	...1
1.1.3. Balance ...	..1
1.1.4. Diversity ...	...1
1.1.5. Freestyle ...	...1
1.1.6. Difficulty ...	..2
1.1.7. Challenge...	..2
1.2. Types of Courses .....	2
1.2.1. General Courses of Fire:...	..2
1.2.2. Special Courses of Fire: ...	...3
1.2.3. Supplementary Courses of Fire: ...	...3
1.3. IPSC Sanctioning.....	3
CHAPTER 2: Course Construction and Modification .....	4
2.1. General Regulations .....	4
2.1.1. Physical Construction ...	.4
2.1.2. Safe Angles of Fire...	..4
2.1.3. Minimum Distances ...	...4
2.1.4. Target Locations...	...5
2.1.5. Range Surface ...	...5
2.1.6. Obstacles ...	..5
2.1.7. Common Firing Lines ...	...5
2.1.8. Target Placement ...	..5
2.1.9. Berms ...	.6
2.2. Course Construction Criteria .....	6
2.2.1. Fault Lines – ...	...6
2.2.2. Obstacles ...	..6
2.2.3. Barriers ...	..7
2.2.4. Tunnels ...	..7
2.2.5. “Cooper” Tunnels...	.7
2.2.6. Stage Props ...	..7
2.3. Modifications to Course Construction .....	8
2.4. Safety Areas.....	9
2.5. Vendor Areas ... ..	.9
2.6. Unloading/Loading Station.....	10

---

CHAPTER 3: Course Information.....	11
3.1. General Regulations .....	11
3.1.1. Published Courses of Fire...	..11
3.1.2. Non-Published Course of Fire ...	..11
3.2. Written Stage Briefings .....	11
3.3. Local, Regional and National Rules .....	12
CHAPTER 4: Range Equipment ... ..	13
4.1. Targets - General Principles...	13
4.2. IPSC Approved Handgun Targets - Paper ... ..	14
4.3. IPSC Approved Handgun Targets - Metal ... ..	14
4.4. Frangible and Synthetic Targets ... ..	15
4.5. Rearrangement of Range Equipment or Surface .....	16
4.6. Range Equipment Failure and Other Issues...	16
CHAPTER 5: Competitor Equipment ... ..	17
5.1. Handguns .....	17
5.2. Holsters and Other Competitor Equipment...	18
5.3. Appropriate Dress ... ..	20
5.4. Eye and Ear Protection .....	20
5.5. Ammunition and Related Equipment .....	21
5.6. Chronograph and Power Factors ... ..	21
5.7. Malfunctions - Competitor's Equipment .....	24
5.8. Official Match Ammunition ... ..	26
CHAPTER 6: Match Structure ... ..	27
6.1. General Principles...	27
6.1.1. String ... ..	..27
6.1.2. Standard Exercise ... ..	..27
6.1.3. Stage ... ..	..27
6.1.4. Match... ..	..27
6.1.5. Tournament ... ..	..27
6.1.6. Grand Tournament ... ..	..27
6.1.7. League ... ..	..28
6.1.8. Shoot-Off... ..	..28
6.2. Match Divisions...	28
6.3. Match Categories ... ..	29
6.4. Regional Teams .....	29
6.5. Competitor Status and Credentials ... ..	30
6.6. Competitor Scheduling and Squadding .....	31
6.7. International Classification System ("ICS") .....	32

---

CHAPTER 7: Match Management ...	33
7.1. Match Officials ...	33
7.1.1. Range Officer (“RO”) ...	33
7.1.2. Chief Range Officer (“CRO”) ...	33
7.1.3. Stats Officer (“SO”) ...	33
7.1.4. Quartermaster (“QM”) ...	33
7.1.5. Range Master (“RM”) ...	33
7.1.6. Match Director (“MD”) ...	34
7.2. Discipline of Match Officials ...	34
7.3. Appointment of Officials ...	34
CHAPTER 8: The Course of Fire ...	35
8.1. Handgun Ready Conditions ...	35
8.2. Competitor Ready Condition ...	36
8.3. Range Communication ...	37
8.3.1. "Load And Make Ready" ...	37
8.3.2. "Are You Ready?" ...	37
8.3.3. "Standby" ...	37
8.3.4. "Start Signal" ...	37
8.3.5. "Stop" ...	38
8.3.6. "If You Are Finished, Unload And Show Clear" ...	38
8.3.7. "If Clear, Hammer Down, Holster" ...	38
8.3.8. "Range Is Clear" ...	38
8.4. Loading, Reloading or Unloading During a Course of Fire ...	39
8.5. Movement ...	39
8.6. Assistance or Interference...	39
8.7. Sight Pictures and Range Inspection ...	40
CHAPTER 9: Scoring ...	41
9.1. General Regulations ...	41
9.1.1. Approaching Targets ...	41
9.1.2. Touching Targets...	41
9.1.3. Prematurely Patched Targets ...	41
9.1.4. Unrestored Targets ...	41
9.1.5. Impenetrable ...	41
9.1.6. Hard Cover ...	42
9.1.7. Target sticks ...	43
9.2. Scoring Methods...	43
9.3. Scoring Ties ...	44
9.4. Scoring and Penalty Values ...	44

9.5.	Scoring Policy ... ..	45
9.6.	Score Verification and Challenge .....	46
9.7.	Score Sheets.....	47
9.8.	Scoring Responsibility... ..	48
9.9.	Scoring of Moving Targets .....	49
9.10.	Official Time .....	49
9.11.	Scoring Programs .....	49
<b>CHAPTER 10:</b>	<b>Penalties .....</b>	<b>50</b>
10.1.	Procedural Penalties - General Regulations .....	50
10.2.	Procedural Penalties - Specific Examples .....	50
10.3.	Match Disqualification - General Regulations .....	52
10.4.	Match Disqualification - Accidental Discharge .....	52
10.5.	Match Disqualification - Unsafe Gun Handling ... ..	53
10.6.	Match Disqualification - Unsportsmanlike Conduct... ..	55
10.7.	Match Disqualification - Prohibited Substances .....	56
<b>CHAPTER 11:</b>	<b>Arbitration and Interpretation of Rules .....</b>	<b>57</b>
11.1.	General Principles... ..	57
11.1.1.	Administration... ..	57
11.1.2.	Access ... ..	57
11.1.3.	Appeals... ..	57
11.1.4.	Appeal to Committee... ..	57
11.1.5.	Retain Evidence... ..	57
11.1.6.	Preparing the Appeal ... ..	57
11.1.7.	Match Official's Duty ... ..	58
11.1.8.	Match Director's Duty... ..	58
11.1.9.	Arbitration Committee's Duty... ..	58
11.2.	Composition of Committee... ..	58
11.2.1.	Level III or higher Matches ... ..	58
11.2.2.	Level I and II Matches... ..	58
11.3.	Time Limits and Sequences ... ..	59
11.3.1.	Time Limit for Appeal to Arbitration ... ..	59
11.3.2.	Decision Time Limit ... ..	59
11.4.	Fees.....	59
11.4.1.	Amount... ..	59
11.4.2.	Disbursement... ..	59
11.5.	Rules of Procedure... ..	59
11.5.1.	Committee's Duty and Procedure ... ..	59
11.5.2.	Submissions... ..	59
11.5.3.	Hearing ... ..	60

11.5.4. Witnesses...	...60
11.5.5. Questions ...	...60
11.5.6. Opinions ...	.60
11.5.7. Inspect Area...	..60
11.5.8. Undue Influence ...	.60
11.5.9. Deliberation ...	..60
11.6. Verdict and Subsequent Action .....	60
11.6.1. Committee Decision ...	.60
11.6.2. Implement Decision ...	.60
11.6.3. Decision is Final ...	.61
11.6.4. Minutes...	...61
11.7. Third Party Appeals .....	61
11.8. Interpretation of Rules ... ..	61
<b>CHAPTER 12: Miscellaneous Matters ... ..</b>	<b>62</b>
12.1. Appendices ... ..	62
12.2. Language ... ..	62
12.3. Disclaimers .....	62
12.4. Gender ... ..	62
12.5. Glossary .....	62
12.6. Measurements .....	65
APPENDIX A1 IPSC Match Levels .....	66
APPENDIX A2 IPSC Recognition .....	67
APPENDIX B1 Target Presentation .....	68
APPENDIX B2 IPSC Target ... ..	69
APPENDIX B3 IPSC Mini Target .....	70
APPENDIX C1 Calibration of IPSC Poppers.....	71
APPENDIX C2 IPSC Popper Calibration Zones.....	73
APPENDIX C3 IPSC Metal Plates .....	74
APPENDIX D1 Open Division... ..	75
APPENDIX D2 Standard Division ... ..	76
APPENDIX D3 Modified Division ... ..	77
APPENDIX D4 Production Division (effective 1 January 2010) .....	78
APPENDIX D5 Revolver Standard Division.....	80
APPENDIX E1 “J” Ladder for 16 Competitors ... ..	81
APPENDIX E2 “J” Ladder for 8 Competitors ... ..	82

APPENDIX F1	Magazine Measurement Procedure.....	83
APPENDIX F2	Trigger Pull Testing Procedure.....	84
APPENDIX F3	Diagram of Equipment Position ...	85
APPENDIX F4	Production Division - Boundaries of Tape on Grips ...	86

## CHAPTER 1: Course Design

The following general principles of course design list the criteria, responsibilities and restrictions governing course designers as the architects of the sport of IPSC shooting.

### 1.1. General Principles

#### 1.1.1. Safety

IPSC matches must be designed, constructed and conducted with due consideration to safety.

#### 1.1.2. Quality

The value of an IPSC match is determined by the quality of the challenge presented in the course design. Courses of fire must be designed primarily to test a competitor's IPSC shooting skills, not their physical abilities.

#### 1.1.3. Balance

Accuracy, Power and Speed are equivalent elements of IPSC shooting, and are expressed in the Latin words "Diligentia, Vis, Celeritas" ("DVC"). A properly balanced course of fire will depend largely upon the nature of the challenges presented therein, however, courses must be designed, and IPSC matches must be conducted in such a way, as to evaluate these elements equally.

#### 1.1.4. Diversity

IPSC shooting challenges are diverse. While it is not necessary to construct new courses for each match, no single course of fire must be repeated to allow its use to be considered a definitive measure of IPSC shooting skills.

#### 1.1.5. Freestyle

IPSC matches are freestyle. Competitors must be permitted to solve the challenge presented in a freestyle manner, and to shoot targets on an "as and when visible" basis. After the start signal, courses of fire must not require mandatory reloads nor dictate a shooting position, location or stance, except as specified below. However, conditions may be created, and barriers or other physical limitations may be constructed, to compel a competitor into shooting positions, locations or stances.

1.1.5.1. Level I and Level II matches are not required to comply strictly with the freestyle requirements or round count limitations (see Section 1.2).

1.1.5.2. Standard Exercises and Classifiers may include mandatory reloads and may dictate a shooting position, location or stance; however, mandatory reloads must never be required in other Long Courses.

1.1.5.3. Standard Exercises and Classifiers may specify shooting with the strong hand or weak hand unsupported. The specified hand must be used exclusively from the point stipulated for the remainder of the string or stage.

#### 1.1.6. Difficulty

IPSC matches present varied degrees of difficulty. No shooting challenge or time limit may be appealed as being prohibitive. This does not apply to non-shooting challenges, which should reasonably allow for differences in competitor's height and physical build.

#### 1.1.7. Challenge

IPSC Handgun matches recognize the difficulty of using full power handguns in dynamic shooting, and must always employ a minimum caliber and power level to be attained by all competitors to reflect this challenge.

### 1.2. Types of Courses

IPSC matches may contain the following types of courses of fire:

#### 1.2.1. General Courses of Fire:

1.2.1.1. "Short Courses" must not require more than 9 rounds to complete and no more than 2 shooting locations.

1.2.1.2. "Medium Courses" must not require more than 16 rounds to complete and no more than 3 shooting locations. Course design and construction must not require more than 9 scoring hits from any single location or view, nor allow a competitor to shoot all targets in the course of fire from any single location or view.

1.2.1.3. "Long Courses" must not require more than 32 rounds to complete. Course design and construction must not require more than 9 scoring hits from any single location or view, nor allow a competitor to shoot all targets in the course of fire from any single location or view.

1.2.1.4. The recommended balance for an IPSC match is a ratio of 3 Short Courses to 2 Medium Courses to 1 Long Course. Where possible, it is further recommended that no single COF in a match represents more than 15% of the total match points available.

### 1.2.2. Special Courses of Fire:

1.2.2.1. "Standard Exercises" must not require more than 24 rounds to complete. Component strings must not require more than 6 rounds (12 rounds if a mandatory reload is specified).

1.2.2.2. Not applicable.

1.2.2.3. "Classifiers" - Courses of fire published by a Regional Directorate and/or IPSC, which are available to competitors seeking a regional and/or international classification. Classifiers must be set-up in accordance with these rules and be conducted strictly in accordance with the notes and diagrams accompanying them. Results must be submitted to the publishing entity in the format required (with the applicable fees, if any), in order for them to be recognized.

### 1.2.3. Supplementary Courses of Fire:

1.2.3.1. "Shoot-Off" must not require more than 9 rounds to complete and must require 1 mandatory reload.

## 1.3. IPSC Sanctioning

1.3.1. Match organizers wishing to receive IPSC sanctioning must comply with the general principles of course design and course construction as well as all other current IPSC Rules and regulations relevant to the discipline. Courses of fire that do not comply with these requirements will not be sanctioned, and must not be publicized or announced as IPSC sanctioned matches.

1.3.2. The IPSC President, his delegate, or an officer of the Confederation (in that order) may withdraw IPSC sanctioning from a match. Such action may be taken at any time where, in his or their opinion, a match contravenes the purpose or spirit of the principles of course design or is in breach of any of the current IPSC Rules or is likely to bring the sport of IPSC shooting into disrepute.

1.3.3. IPSC match level requirements and recommendations are specified in Appendix A1.

## CHAPTER 2: Course Construction and Modification

The following general regulations of course construction list the criteria, responsibilities and restrictions applicable to courses of fire in IPSC matches. Course designers, host organizations and officials are governed by these regulations.

### 2.1. General Regulations

#### 2.1.1. Physical Construction

Safety considerations in the design, physical construction, and stated requirements for any course of fire are the responsibility of the host organization subject to the approval of the Range Master. Reasonable effort must be made to prevent injury to competitors, officials and spectators during the match. Course design should prevent inadvertent unsafe actions wherever possible. Consideration must be given to the operation of any course of fire to provide suitable access for officials supervising the competitors.

#### 2.1.2. Safe Angles of Fire

Courses of fire must always be constructed taking into account safe angles of fire. Consideration must be given to safe target and frame construction and the angle of any possible ricochets. Where appropriate the physical dimensions and suitability of backstops and side berms must be determined as part of the construction process. Unless otherwise specified, the default maximum muzzle angle is 90 degrees in all directions, measured from the front of the competitor facing directly center downrange. Violations are subject to Rule 10.5.2.

2.1.2.1. Subject to the direction and approval of the Regional Director, stage(s) or range specific muzzle angles (reduced or increased) may be approved. Full details of the applicable angles must be published in advance of the match and must be included in the written stage briefings (also see Section 2.3). Violations are subject to Rule 10.5.2.

#### 2.1.3. Minimum Distances

Whenever metal targets or metal hard cover are used in a course of fire, precautions must be taken so that competitors and Match Officials maintain a minimum distance of 7 meters from them while they are being shot. Where possible, this should be done with physical barriers. If Fault Lines are used to limit the approach to metal targets, they must be placed at least 8 meters from the targets so that the competitor may inadvertently fault the line and still be outside the 7 meter minimum distance (see Rule 10.4.7). Care should also be taken in respect of metal props in the line of fire.

2.1.4. Target Locations

When a course is constructed to include target locations other than immediately downrange, organizers and officials must protect or restrict surrounding areas to which competitors, officials or spectators have access. Each competitor must be allowed to solve the competitive problem in his own way and must not be hindered by being forced to act in any manner which might cause unsafe action. Targets must be arranged so that shooting at them on an “as and when visible” basis will not cause competitors to breach safe angles of fire.

2.1.5. Range Surface

Where possible, the range surface must be prepared prior to the match, and be kept moderately clear of debris during the match, to provide reasonable safety for competitors and officials. Consideration should be given to the possibility of inclement weather and competitor actions. Range Officials may add gravel, sand or other materials to a deteriorated range surface at any time, and such range maintenance actions may not be appealed by competitors.

2.1.6. Obstacles

Natural or created obstacles in a course of fire should reasonably allow for variations in competitors' height and physical build and should be constructed to provide reasonable safety for all competitors, Match Officials and spectators.

2.1.7. Common Firing Lines

Courses of fire where multiple competitors are required to fire simultaneously from a common firing line (e.g. Standard Exercises, Shoot-Off), must provide a minimum of 1.5 meters of free space between each competitor.

2.1.8. Target Placement

Care must be taken with the physical placement of a paper target to prevent a “shoot through”.

2.1.8.1. Target placement should be clearly marked on the target stands for target replacement and target stands should be securely fixed or their locations should be clearly marked on the range surface to ensure consistency throughout the entire match. Furthermore, target types should be specified and identified on the target frames or stands prior to the start of the match to ensure that a scoring target is not interchanged with a no-shoot after the match has commenced.

- 2.1.8.2. When paper and metal targets are used in close proximity in a course of fire, care must be taken to minimize the risk of splatter from metal targets.
- 2.1.8.3. When IPSC Poppers are used in a course of fire, care should be taken to ensure that the location or foundation area is prepared to provide consistent operation throughout the match.
- 2.1.8.4. Static targets (i.e. those which are not activated) must not be presented at an angle greater than 90 degrees from the vertical.

#### 2.1.9. Berms

All berms are “off limits” to all persons at all times, except when access to them is specifically permitted by a Range Officer (see Rule 10.6.1).

### 2.2. Course Construction Criteria

During the construction of a course of fire, a variety of physical barriers may be used to restrict competitor movement and to provide additional competitive challenges as follows:

#### 2.2.1. Fault Lines -

Competitor movement should preferably be restricted through the use of physical barriers, however, the use of Fault Lines is permitted as follows:

- 2.2.1.1. To prevent unsafe and/or unrealistic charging at, or retreat from, targets;
- 2.2.1.2. To simulate the use of physical barriers and/or cover;
- 2.2.1.3. To define the boundaries of a general shooting area or part thereof.
- 2.2.1.4. Fault Lines should be constructed of wood or other suitable materials, they must rise at least 2 centimeters above ground level, they must be a minimum of 1 meter in length, and they should be of a length sufficient to cover the areas most likely to be used by competitors. In any case, Fault Lines are deemed to extend to infinity. Fault lines must be fixed firmly in place to ensure they remain consistent throughout the match.

#### 2.2.2. Obstacles

Courses of fire may include the use of barriers or major obstacles to be surmounted by competitors. Obstacles used in this way must not exceed a height of 2 meters. Obstacles over 1 meter in height must be supplied with scaling aids to assist competitors and must be constructed to provide for the competitor’s safety in the following ways:

- 2.2.2.1. Obstacles must be firmly anchored and braced to provide adequate support when in use. Wherever possible, unduly sharp or rough surfaces must be removed to reduce the possibility of injury to competitors and/or Match Officials.
- 2.2.2.2. The descending side of any obstacle must be clear of obstructions or natural hazards.
- 2.2.2.3. Competitors must be allowed to test such obstacles before the course of fire and should be given a short period to do so.
- 2.2.2.4. Competitors must not be required to holster their handgun before ascending these obstacles.

### 2.2.3. Barriers

Must be constructed in the following manner:

- 2.2.3.1. They must be high enough and strong enough to serve the intended purpose.
- 2.2.3.2. They should include Fault Lines projecting rearward at ground level from the side edges.

### 2.2.4. Tunnels

A tunnel that a competitor is required to enter or pass through must be constructed of suitable material and to any length. However, sufficient ports must be provided to allow Match Officials to safely monitor competitor action. Tunnel mouth edges must be prepared to minimize the possibility of injury to competitors and Match Officials. Course designers must clearly designate the entrance and exit portions of the tunnel as well as the parameters for shooting at any targets from within the tunnel (e.g. Fault Lines).

### 2.2.5. “Cooper” Tunnels

Are tunnels comprised of braced uprights supporting loose overhead materials (e.g. wooden slats), which may be inadvertently dislodged by competitors (see Rule 10.2.5). These tunnels may be constructed to any height, but overhead materials must not be heavy enough to cause injury if they fall.

### 2.2.6. Stage Props

Where these items are intended to support a competitor in motion or while shooting targets, they must be constructed with the safety of the competitor and Match Officials as a priority. Provisions must be made to allow Match Officials to safely monitor and control competitor action at all times. Props must be strong enough to withstand use by all competitors.

2.3. Modifications to Course Construction

- 2.3.1. Match Officials may, for any reason, modify the physical construction or stage procedure for a course of fire, provided that such changes are approved in advance by the Range Master. Any such physical changes or additions to a published course of fire should be completed before the stage begins.
- 2.3.2. All competitors must be notified of any such changes as soon as possible. As a minimum, they must be notified by the official in charge of the course of fire during the squad briefing.
- 2.3.3. If the Range Master approves any such action after the match begins he must either:
  - 2.3.3.1. Allow the course of fire to continue with the modification affecting only those competitors who have not already completed the stage. If a competitor's actions caused the change, that competitor must be required to reshoot the altered course of fire; or
  - 2.3.3.2. If possible, require all competitors to complete the course of fire as revised with all previous attempts removed from the match scores.
  - 2.3.3.3. A competitor who refuses to reshoot a course of fire, under this or any other Section, when so ordered by a Range Official, will receive a zero score for that stage, irrespective of any previous attempt.
- 2.3.4. If the Range Master (in consultation with the Match Director) determines that the physical or procedural change results in a loss of competitive equity and it is impossible for all competitors to attempt the revised stage, or if the stage has been rendered unsuitable or unworkable for any reason, that stage and all associated competitor scores must be deleted from the match.
- 2.3.5. During inclement weather, the Range Master may order that paper targets be fitted with transparent protective covers and/or overhead shelters, and this order is not subject to appeal by competitors (see Rule 6.6.1). Such items must be applied and remain fitted to all affected targets for the same period of time, until the order is rescinded by the Range Master.
- 2.3.6. If the Range Master (in consultation with the Match Director) deems that climatic or other conditions have, or are likely to, seriously affect the safety and/or conduct of a match, he may order that all shooting activities be suspended, until he issues a "resume shooting" directive.

## 2.4. Safety Areas

The host organization is responsible for the construction and placement of a sufficient number of Safety Areas for the match. They should be conveniently placed and easily identified with signs. Safety Areas should include a table with the safe direction and boundaries clearly shown. Safety Areas should include a suitable gun rack or racks, as they are intended for use by all IPSC disciplines, particularly during Tournaments.

2.4.1. Competitors are permitted to use the Safety Areas for the activities stated below provided they remain within the boundaries of the Safety Area and the firearm is pointed in a safe direction. Violations may be subject to match disqualification (see Rules 10.5.1 & 10.5.12).

2.4.1.1. Casing, uncasing, and holstering unloaded firearms.

2.4.1.2. Practice the mounting, drawing, "dry-firing" and re-holstering of unloaded firearms.

2.4.1.3. Practice the insertion and removal of empty magazines and/or to cycle the action of a firearm.

2.4.1.4. Conduct inspections, stripping, cleaning, repairs and maintenance of firearms, component parts and other accessories.

2.4.2. Dummy ammunition (including practice or training rounds, snap caps and empty cases), loaded magazines, loaded speed loading devices and live rounds must not be handled in a Safety Area under any circumstances (see Rule 10.5.12).

## 2.5. Vendor Areas

2.5.1. Vendors (i.e. individuals, corporations and other entities displaying or selling merchandise at an IPSC match) are solely responsible for the safe handling and security of their products, and ensuring they are displayed in a condition that must not endanger any person. It is recommended that assembled firearms be deactivated prior to being displayed.

2.5.2. The Range Master (in consultation with the Match Director) must clearly delineate the vendor area, and he may issue "Acceptable Practice Guidelines" to all vendors, who are responsible for their implementation in respect of their own merchandise.

2.5.3. Competitors may handle unloaded vendor's firearms while remaining wholly within the vendor areas, provided reasonable care is taken to ensure that the muzzle is not pointed at any person while being handled.

- 2.5.4. Competitors must not draw or re-holster their competition firearms in the vendor area (see Rule 10.5.1). Competitors seeking gunsmithing services for their competition firearms must firstly place them in a gun bag or gun case, in a designated safety area, before passing them to a vendor in the vendor area.
- 2.6. Unloading/Loading Station
- 2.6.1. If it is possible that some competitors arriving at a range where an IPSC match is being held may be in possession of a loaded firearm on their person (e.g. law enforcement officers etc.), match organizers should provide an Unloading/Loading Station to enable such competitors to safely unload their firearms prior to entering the range, and to safely load their firearms again on departure from the range. The Unloading/Loading Station should be conveniently located outside the entrance to the range (or outside the portion of the range allocated to the IPSC match), it should be clearly sign-marked and it must include a suitable impact zone.

## CHAPTER 3: Course Information

### 3.1. General Regulations

The competitor is always responsible to safely fulfil the requirements of a course of fire but can only reasonably be expected to do so after verbally or physically receiving the written stage briefing, which must adequately explain the requirements to the competitors. Course information can be broadly divided into the following types:

#### 3.1.1. Published Courses of Fire

Registered competitors and/or their Regional Directorates must be provided with the same course of fire information, within the same notice period, in advance of the match. The information may be provided by physical or electronic means, or by reference to a website (also see Section 2.3).

#### 3.1.2. Non-Published Course of Fire

Same as Rule 3.1.1 except that the details for the course of fire are not published beforehand. The stage instructions are provided in the written stage briefing.

### 3.2. Written Stage Briefings

3.2.1. A written stage briefing approved by the Range Master must be posted at each course of fire prior to commencement of the match. This briefing will take precedence over any course of fire information published or otherwise communicated to competitors in advance of the match, and it must provide the following minimum information:

- Scoring Method:
- Targets (type & number):
- Minimum number of rounds:
- The handgun ready condition:
- Start position:
- Time starts: audible or visual signal:
- Procedure:

3.2.2. The Range Official in charge of a course of fire must read out the written stage briefing verbatim to each squad. The Range Official may visually demonstrate the acceptable Start Position and Gun Ready Condition.

3.2.3. The Range Master may modify a written stage briefing at any time for reasons of clarity, consistency or safety (see Section 2.3).

3.2.4. After the written stage briefing has been read to competitors, and questions arising there from have been answered, competitors should be permitted to conduct an orderly inspection ("walkthrough") of the course of fire. The duration of time for the inspection must be stipulated by the Range Officer, and it should be the same for all competitors. If the course of fire includes moving targets or similar items, these should be demonstrated to all competitors for the same duration and frequency.

### 3.3. Local, Regional and National Rules

3.3.1. IPSC matches are governed by the rules applicable to the discipline. Host organizations may not enforce local rules except to comply with legislation or legal precedent in the applicable jurisdiction. Any voluntarily adopted rules that are not in compliance with these rules must not be applied to IPSC matches without the express consent of the Regional Directorate and the IPSC Executive Council.

## CHAPTER 4: Range Equipment

### 4.1. Targets - General Principles

4.1.1. Only targets approved by the IPSC Assembly and which fully comply with the specifications in Appendices B and C are to be used for IPSC Handgun matches (see Section 9.4).

4.1.1.1. If one or more targets at a match fail to comply exactly with the stated specifications, and if replacement targets of the correct specifications are unavailable, the Range Master must decide whether or not the variance is acceptable for that match, and which provisions of Section 2.3 of these rules will apply, if any. However, the Range Master's decision will only affect the match in progress, and will not serve as a precedent for future matches held at the same location, or for any subsequent use of the subject targets at another match.

4.1.2. Scoring targets used in all IPSC Handgun matches must be of a single color, as follows:

4.1.2.1. The scoring area of scoring paper targets must be of a typical cardboard color.

4.1.2.2. The entire front of scoring metal targets must be painted a single color, preferably white.

4.1.3. No-shoots must be clearly marked or be of a single color different from scoring targets. Metal no-shoots in the general size and shape of authorized paper targets may be used. Metal no-shoots do not have a non scoring border.

4.1.4. Targets used in a course of fire may be partially or wholly hidden through the use of hard or soft cover, as follows:

4.1.4.1. Cover provided to hide all or a portion of a target will be considered hard cover. When possible hard cover should not be simulated but constructed using impenetrable materials (see Rule 2.1.3). Whole paper targets must not be used solely as hard cover.

4.1.4.2. Cover provided merely to obscure targets is considered soft cover. Shots which have passed through soft cover and which strike a scoring target will score. Shots that have passed through soft cover before hitting a no-shoot will be penalized. All scoring zones on targets hidden by soft cover must be left wholly intact. Targets obscured by soft cover must either be visible through the soft cover or at least a portion of the affected target(s) must be visible from around the soft cover.

- 4.1.5. Declaring a single, intact target to represent two or more targets by use of tape, paint or any other means is prohibited.
- 4.2. IPSC Approved Handgun Targets - Paper
  - 4.2.1. There are two sizes of paper targets approved for use in IPSC Handgun matches (see Appendix B). The two sizes must not be included together in the same stage.
  - 4.2.2. Paper targets must have scoring lines and non-scoring borders clearly marked on the front of the target, however, scoring lines and non-scoring borders should not be visible beyond a distance of 10 meters. The scoring zones reward power in IPSC matches.
    - 4.2.2.1. The front of paper no-shoots must include a sufficiently distinguishable non-scoring border. In the absence of perforations or other suitable markings, the Range Master must order that all affected targets have a replacement non-scoring border drawn or fitted thereon.
  - 4.2.3. Paper targets must never be required to receive more than 12 hits before being scored and patched.
  - 4.2.4. When the scoring area of a paper target is to be partially hidden, course designers must simulate hard cover in one of the following ways:
    - 4.2.4.1. By actually hiding a portion of the target (see Rule 4.1.4.1).
    - 4.2.4.2. By physically cutting targets to remove the portion deemed to be hidden by hard cover. Such targets must be fitted with a replacement non-scoring border, which must extend the full width of the cut scoring area (see Rule 4.2.2).
    - 4.2.4.3. By painting or taping the portion of the target deemed to be hidden by hard cover a single and visibly contrasting color.
    - 4.2.4.4. Hard cover (and overlapping no-shoots) must not completely hide the highest scoring zone on a partially hidden paper target.
- 4.3. IPSC Approved Handgun Targets - Metal
  - 4.3.1. Approved metal targets for use in IPSC Handgun matches are as follows:
    - 4.3.1.1. IPSC Poppers, which must be calibrated as specified in Appendix C1, are approved metal targets designed to recognize power.

- 4.3.1.2. IPSC Mini Poppers, which must be calibrated as specified in Appendix C1, are approved metal targets designed to recognize power and are intended to simulate regular sized Poppers placed at greater distances. IPSC Mini Poppers may be included together with full sized IPSC Poppers in the same stage.
  - 4.3.1.3. Pepper Poppers and Classic Poppers may be included in the same course of fire. It is recommended that IPSC poppers which fall forwards be used.
  - 4.3.1.4. Various sizes of metal plates may be used (see Appendix C3), however, metal plates must not be used exclusively in a course of fire. At least one authorized scoring paper target or scoring IPSC Popper (in addition to any paper or metal no-shoots) must be included in each course of fire. Metal plates are not subject to calibration or calibration challenges.
  - 4.3.1.5. Scoring metal targets must be shot and fall or overturn to score. Scoring metal targets which accidentally turn edge-on or sideways or which a Range Officer deems have fallen or overturned due to a shot on the apparatus supporting them or for any other accidental reason, will be treated as range equipment failure (see Rule 4.6.1).
  - 4.3.1.6. Unlike IPSC Poppers, metal plates are not subject to calibration or calibration challenges. Therefore if a metal plate has been adequately hit but it fails to fall or overturn, a Range Officer may declare range equipment failure and order the competitor to reshoot the course of fire, after the faulty plate has been rectified.
  - 4.3.1.7. Metal no-shoots designed to fall or overturn when hit, but which accidentally turn edge-on or sideways, will be treated as range equipment failure.
  - 4.3.1.8. Metal no-shoots designed to remain upright when hit must, if hit, be repainted after each competitor ends their attempt at the course of fire, failing which subsequent competitors must not be penalized for hits visible on their surface.
- 4.4. Frangible and Synthetic Targets
- 4.4.1. Frangible targets, such as clay pigeons or tiles, are not authorized targets for IPSC Handgun matches.

- 4.4.2. Synthetic targets (e.g. "self-sealing" targets etc.), sometimes used by indoor ranges, must not be used at Level III or higher matches. However, subject to the prior written approval of a Regional Directorate, synthetic targets may be used at Level I and II matches held within their Region.
- 4.5. Rearrangement of Range Equipment or Surface
  - 4.5.1. The competitor must not interfere with the range surface, natural foliage, constructions, props or other range equipment (including targets, target stands and target activators) at anytime. Violations may incur one procedural penalty per occurrence at the discretion of the Range Officer.
  - 4.5.2. The competitor may request that Match Officials take corrective actions to ensure consistency in respect of the range surface, the presentation of targets and/or any other matter. The Range Master will have final authority concerning all such requests.
- 4.6. Range Equipment Failure and Other Issues
  - 4.6.1. Range equipment must present the challenge fairly and equitably to all competitors. Range equipment failure includes, but is not limited to, the displacement of paper targets, the premature activation of metal or moving targets, the malfunction of mechanically or electrically operated equipment, and the failure of props such as openings, ports, and barriers. The declaration and/or use of any loaded (see Rule 10.5.13) or unloaded firearm as "range equipment" is prohibited.
  - 4.6.2. A competitor who is unable to complete a course of fire due to range equipment failure, or if a metal or moving target was not reset prior to his attempt at a course of fire, must be required to reshoot the course of fire after corrective actions have been taken.
  - 4.6.3. Chronic malfunction of equipment in a course of fire may result in the removal of that stage from the match results (see Rule 2.3.4).

## CHAPTER 5: Competitor Equipment

### 5.1. Handguns

5.1.1. Handguns are regulated by Divisions (see Appendix D), however, courses of fire must remain consistent for all Divisions.

5.1.2. The minimum cartridge case dimension for handguns to be used in IPSC matches is 9 X 19 mm. The minimum bullet diameter is 9 mm (.354 inches).

### 5.1.3. Sights

Types of sights identified by IPSC are:

5.1.3.1. "Open sights" are aiming devices fitted to a firearm which do not use electronic circuitry and/or lenses. Fiber-optic inserts are deemed not to be lenses.

5.1.3.2. "Optical/electronic sights" are aiming devices (including flashlights) fitted to a firearm which use electronic circuitry and/or lenses.

5.1.3.3. The Range Master is the final authority in respect of the classification of any sights used in an IPSC match and/or their compliance with these rules, including the Divisions in Appendix D.

5.1.4. Unless required by a Division (see Appendix D), there is no restriction on the trigger pull weight of a firearm, however, the trigger mechanism must, at all times, function safely.

5.1.5. Triggers and/or trigger shoes that extend beyond the width of the trigger guard are expressly prohibited.

5.1.6. Firearms must be serviceable and safe. Range Officers may demand examination of a competitor's firearm or allied equipment, at any time, to check they are functioning safely. If any such item is declared unserviceable or unsafe by a Range Officer, it must be withdrawn from the match until the item is repaired to the satisfaction of the Range Master.

5.1.7. Competitors must use the same handgun and type of sights for all courses of fire in a match. However, in the event that a competitor's original handgun and/or sights become unserviceable or unsafe during a match, the competitor must, before using a substitute handgun and/or sights, seek permission from the Range Master who may approve the substitution provided he is satisfied:

5.1.7.1. The substitute handgun satisfies the requirements of the relevant Division.

- 5.1.7.2. In using the substitute handgun the competitor will not gain a competitive advantage.
- 5.1.7.3. The competitor's ammunition, when tested in the substitute handgun attains the minimum power factor using the match chronograph (see Rule 5.6.3.9).
- 5.1.8. A competitor who substitutes or significantly modifies a handgun during a match without the prior approval of the Range Master will be subject to the provisions of Section 10.6.
- 5.1.9. A competitor must never use or wear on his person more than one firearm during a course of fire (see Rule 10.5.7).
- 5.1.10. Handguns with shoulder stocks and/or fore grips of any kind are prohibited (see Rule 10.5.15).
- 5.1.11. Handguns offering "burst" and/or fully automatic operation (i.e. whereby more than one bullet can be discharged on a single pull or activation of the trigger) are prohibited (see Rule 10.5.15).
- 5.2. Holsters and Other Competitor Equipment
  - 5.2.1. Carry and Storage - Except when within the boundaries of a safety area, or when under the supervision and direct command of a Range Officer, competitors must carry their handguns unloaded in a gun case, gun bag or in a holster securely attached to a belt on their person (see Rule 10.5.1).
  - 5.2.2. Competitors carrying their handgun in a holster must have an empty magazine well, and the hammer or striker must be decocked. Violation will incur a warning for the first occurrence but will be subject to Section 10.6 for subsequent occurrences in the same match.
  - 5.2.3. Unless otherwise specified in the written stage briefing, the belt carrying the holster and all allied equipment must be worn at waist level. The belt or the inner belt or both must be either permanently sewn at the waist, or secured with a minimum of three belt loops.
    - 5.2.3.1. Female competitors may be permitted to wear a belt, holster and allied equipment at hip level, however, the top of the belt must not be positioned below the furthest lateral point of the top of the femur (tuberosity major). If another belt is worn at waist level, the holster and allied equipment must be placed on the lower belt (see Appendix D).
  - 5.2.4. Spare ammunition, magazines and speed loading devices should be carried in retention devices specifically designed for that purpose, to reduce the risk of loss during a course of fire.

- 5.2.4.1. For table starts or similar, after the Start Signal, the competitor may carry those items anywhere on their person, and this will not be treated as contravention of Divisional rules.
- 5.2.5. Where a Division specifies a maximum distance that a competitor's handgun and equipment may extend away from a competitor's body, a Range Officer may check compliance by measuring the closest distance between the competitor's torso and the center of the longest dimension of the handgun grip and/or any reloading devices.
  - 5.2.5.1. These measurements will be done while the competitor is standing naturally upright. See Appendix F3.
  - 5.2.5.2. Any competitor who fails the foregoing test will be required to immediately adjust his holster or equipment to comply with the requirements of the relevant Division. The Range Master may make allowances for variations in these requirements due to anatomical considerations. Some competitors may not be able to fully comply.
  - 5.2.5.3. Unless specified in the written stage briefing, or unless required by a Range Officer, the position of holsters and allied equipment must not be moved or changed by a competitor from stage to stage. If a retaining strap or flap is attached to a holster, it must be applied or closed prior to issuance of the "Standby" command (see Rule 8.3.3).
- 5.2.6. IPSC Handgun matches will not require the use of a particular type or brand of holster. However, the Range Master may deem that a competitor's holster is unsafe and order that it be improved to his satisfaction, failing which it must be withdrawn from the match.
- 5.2.7. Competitors must not be permitted to commence a course of fire wearing:
  - 5.2.7.1. A shoulder holster or "tie-down" rig (visible or otherwise), except as specified in Rule 5.2.8,
  - 5.2.7.2. A holster with the heel of the butt of the handgun below the top of the belt, except as specified in Rule 5.2.8,
  - 5.2.7.3. A holster with the muzzle of the handgun pointing further than 1 meter from the competitor's feet while standing relaxed,
  - 5.2.7.4. A holster which does not completely prevent access to, or activation of, the trigger of the handgun while holstered.

- 5.2.8. Competitors deemed by the Match Director to be active law enforcement officers or military personnel may be entitled to use their duty holsters and allied equipment however, the Range Master will remain the final authority in respect of the safety and suitability of using such equipment at IPSC matches.
- 5.2.8.1. Competitors deemed by the Range Master to be permanently and significantly disabled may be given special dispensation in relation to the type and/or placement of their holster and allied equipment, and the Range Master will remain the final authority in respect of the safety and suitability of using such equipment at IPSC matches.
- 5.3. **Appropriate Dress**
- 5.3.1. The use of camouflage or other similar types of military or police garments is discouraged. The exception are competitors who are law enforcement or military personnel. The Match Director will be the final authority in respect of what garments must not be worn by competitors.
- 5.4. **Eye and Ear Protection**
- 5.4.1. All persons are warned that the correct use of adequate eye and ear protection is in their own interest and of paramount importance to prevent injury to vision and hearing. It is strongly recommended that eye and ear protection be worn at all times by all persons while on the range premises.
- 5.4.2. Host organizations may require the use of such protection by all persons, as a condition of attendance and while present on the range premises. If so, Range Officials must make every reasonable effort to ensure that all persons wear adequate protection.
- 5.4.3. If a Range Official notices that a competitor has lost or displaced their eye or ear protection during a course of fire, or has commenced a course of fire without them, the Range Official must immediately stop the competitor who will be required to reshoot the course of fire after the protective devices have been restored.
- 5.4.4. A competitor who inadvertently loses eye or ear protection during a course of fire, or commences a course of fire without them, is entitled to stop, point their firearm in a safe direction and indicate the problem to the Range Official, in which case the provisions of the previous rule will apply.
- 5.4.5. Any attempt to gain a competitive advantage by removing eye and/or ear protection during a course of fire will be considered unsportsmanlike conduct (see Rule 10.6.2).

- 5.4.6. If a Range Officer deems that a competitor about to make an attempt at a course of fire is wearing inadequate eye or ear protection, the Range Officer may order the competitor to rectify the situation before allowing the competitor to continue. The Range Master is the final authority on this matter.
- 5.5. Ammunition and Related Equipment
  - 5.5.1. Competitors at an IPSC match are solely and personally responsible for the safety of all and any ammunition, which they bring to the match. Neither IPSC nor any IPSC Officers, nor any organization affiliated to IPSC, nor the officers of any organization affiliated to IPSC accepts any responsibility whatsoever in this regard, nor in respect of any loss, damage, accident, injury or death suffered by any person or entity as a result of the lawful or unlawful use of any such ammunition.
  - 5.5.2. Magazines and speed loading devices must comply with the provisions of the relevant Division.
  - 5.5.3. Spare magazines, speed loading devices or ammunition dropped or discarded by a competitor after the start signal may be retrieved, however, their retrieval is, at all times, subject to all safety rules.
  - 5.5.4. Metal piercing, incendiary and/or tracer ammunition is prohibited at IPSC matches (see Rule 10.5.15).
  - 5.5.5. All ammunition used by a competitor must satisfy all the requirements of the relevant Division as defined in Appendix D.
  - 5.5.6. Any ammunition deemed unsafe by a Range Officer must be immediately withdrawn from the match (See Rule 10.5.15).
  - 5.5.7. Ammunition which discharges more than one bullet or other scoring projectile from a single round is prohibited (see Rule 10.5.15).
- 5.6. Chronograph and Power Factors
  - 5.6.1. The power factors for each Division are stipulated in Appendix D. One or more official match chronographs must be used to assist in the determination of the power factor of each competitor's ammunition. However, in the absence of official match chronographs, the power factor declared by a competitor cannot be challenged.
    - 5.6.1.1. The power factor rating to enable a competitor's scores to be included in match results is called "Minor". The power factor floor for Minor rating, and other specific requirements applicable to each Division, are stipulated in Appendix D.

- 5.6.1.2. Some Divisions offer a higher power factor rating called "Major", which enables competitors to earn more points for peripheral shots on scoring paper targets. The power factor floor for Major rating, if available, and other specific requirements applicable to each Division, are stipulated in Appendix D.
- 5.6.1.3. The associated values awarded for Minor and Major scoring hits are illustrated in Appendices B and C. The method used to determine power factor is explained in the following section.
- 5.6.2. The official match chronograph(s) must be properly set-up and verified each day by Match Officials in the following manner:
  - 5.6.2.1. At the beginning of the first day of the match, a Range Officer will fire 3 rounds from the supply of the official match calibration ammunition through the calibration firearm over the chronograph, and the average velocity of the 3 rounds will be recorded.
  - 5.6.2.2. On each of the following match days, the process will be repeated using the same firearm and ammunition supply (ideally from the same factory lot).
  - 5.6.2.3. The chronograph will be deemed to be within tolerance if the daily average is within +/- 5% of the applicable minimum power factor.
  - 5.6.2.4. Should a daily variance exceed the allowable tolerance stated above, the Range Master will take whatever steps he deems necessary to rectify the situation.
- 5.6.3. Ammunition Testing Procedure
  - 5.6.3.1. Ammunition must be tested using the competitor's firearm. Moreover, prior to and/or during testing, the competitor's firearm and the component parts thereof must not be altered or modified in any way from the condition it is being used (or will be used) at the match. Violations will be subject to Section 10.6.
  - 5.6.3.2. An initial 8 sample rounds for the chronograph test will be drawn from each competitor at a time and place determined by Match Officials, who may require additional tests of a competitor's ammunition at any time during the match.

- 5.6.3.3. From the 8 sample rounds drawn by Match Officials, 1 bullet is weighed to determine the actual bullet weight, and 3 are fired over the chronograph. In the absence of a bullet puller and scales, the competitor's declared bullet weight will be used. Digits displayed on the official match bullet scales and chronograph will be used at face value, irrespective of the number of decimal places indicated on the particular model of measuring device used at the match.
- 5.6.3.4. Power factor is calculated using the bullet weight and the average velocity of the 3 rounds fired, according to the following formula:

$$\text{Power Factor} = \frac{\text{bullet weight (grains)} \times \text{average velocity (ft p/sec)}}{1000}$$

The final result will ignore all decimal places (e.g. for IPSC purposes, a result of 124.9999 is not 125).

- 5.6.3.5. If the resultant power factor fails to meet the declared power factor floor, another 3 rounds will be fired over the chronograph. The power factor will be recalculated using the bullet weight and the average velocity of the 3 highest velocity rounds from the 6 rounds fired.
- 5.6.3.6. If the power factor is still insufficient, the competitor may elect to have his final bullet:
- (a) Weighed and, if heavier than the first bullet, the power factor calculation in Rule 5.6.3.5 will be recalculated using the heavier bullet weight, or
  - (b) Fired over the chronograph and the power factor recalculated using the first bullet weight, and the average velocity of the 3 highest velocity rounds from the 7 rounds fired.
- 5.6.3.7. If the resultant power factor fails to meet the Major power factor floor of the relevant Division, the competitor's entire match scores will be recalculated as Minor, if achieved.
- 5.6.3.8. If the resultant power factor fails to meet the minimum power factor floor for the relevant Division, the competitor may continue shooting the match, but not for score or match recognition.

- 5.6.3.9. If a competitor's ammunition is retested, or if any authorized replacement ammunition is used, and different power factors are recorded when tested according to these rules, the lower power factor must be applied to score all courses of fire, including those already completed by the competitor.
- 5.6.3.10. The scores of a competitor who, for any reason, fails to present his firearm for testing at the designated time and location and/or who fails to provide sample rounds for testing whenever requested by a Match Official, will be removed from the match results.
- 5.6.3.11. If the Range Master deems that a match chronograph has become inoperative, and further testing of competitor's ammunition is not possible, the power factors of competitors which have been successfully tested will stand, and the "Major" or "Minor" power factors declared by all other competitors who have not been tested will be accepted without challenge, subject to any applicable Division requirements (see Appendix D).

## 5.7. Malfunctions - Competitor's Equipment

- 5.7.1. In the event that a competitor's firearm malfunctions after the start signal, the competitor may safely attempt to correct the problem and continue the course of fire. During such corrective action, the competitor must keep the muzzle of the firearm pointing safely downrange at all times. The competitor may not use rods, or other tools to correct the malfunction. Violations will result in a zero score for the stage.
  - 5.7.1.1. A competitor who experiences a firearm malfunction while responding to the "Load And Make Ready" or "Make Ready" command, but prior to issuance of the "Start Signal", is entitled to retire, under the authority and supervision of the officiating Range Officer, to repair his firearm, without penalty, subject to the provisions of Rule 5.7.4, Rule 8.3.1.1 and all other safety rules. Once the repairs have been completed (and the provisions of Rule 5.1.7 have been satisfied, if applicable), the competitor may return to attempt the course of fire, subject to scheduling as determined by the officiating Range Officer or Range Master.
- 5.7.2. While rectifying a malfunction that requires the competitor to clearly move the firearm away from aiming at a target, the competitor's fingers must be clearly visible outside the trigger guard (see Rule 10.5.8).

- 5.7.3. In the event that a firearm malfunction cannot be corrected by the competitor within 2 minutes, he must point the firearm safely downrange and advise the Range Officer, who will terminate the course of fire (excluding any unattempted component strings in a Standard Exercise) in the normal manner. The course of fire (excluding any unattempted component strings in a Standard Exercise) will be scored as shot including all applicable misses and penalties.
- 5.7.4. Under no circumstances is a competitor permitted to leave a course of fire in the possession of a loaded firearm (see Rule 10.5.13).
- 5.7.5. Where the firearm has failed as above, the competitor must not be permitted to reshoot the course of fire or string. This includes the instance where a firearm is declared unserviceable or unsafe during a course of fire or string. However, any unattempted component strings in a Standard Exercise may still be attempted by the affected competitor after the firearm has been repaired, and prior to when match results are declared final by the Match Director.
- 5.7.6. In the event that a Range Officer terminates a course of fire due to a suspicion that a competitor has an unsafe firearm or unsafe ammunition (e.g. a “squib” load), the Range Officer will take whatever steps he deems necessary to return both the competitor and the range to a safe condition. The Range Officer will then inspect the firearm or ammunition and proceed as follows:
- 5.7.6.1. If the Range Officer finds evidence that confirms the suspected problem, the competitor will not be entitled to a reshoot, but will be ordered to rectify the problem. On the competitor's score sheet, the time will be recorded up to the last shot fired, and the course of fire will be scored "as shot", including all applicable misses and penalties (see Rule 9.5.6).
- 5.7.6.2. If the Range Officer discovers that the suspected safety problem does not exist, the competitor will be required to reshoot the stage.
- 5.7.6.3. A competitor who self-stops due to a suspected or actual squib load is not entitled to a reshoot.

5.8. Official Match Ammunition

- 5.8.1. When match organizers make official match ammunition available for purchase by competitors at a match, the Match Director must, both in advance in official match literature (and/or on the official match website), and by way of a sign certified by him and posted at a conspicuous place at the point of sale, clearly identify which manufacturer/brand, specific cartridges and load descriptions are deemed to be rated, by Division, as either Minor or Major power factor, as the case may be. The subject rounds will usually be exempt from Rule 5.6.3 testing by chronograph, subject to the following conditions:
- 5.8.1.1. The competitor must obtain, and retain for the duration of the match, an official receipt from the match organizers (or their nominated vendor) at the match evidencing details of the quantity and description of the subject ammunition purchased at the match, and said receipt must be produced on demand by any Match Official, failing which the provisions of Rule 5.8.1 will not apply. Ammunition not purchased from the match organizers (or their nominated vendor) at the match will not enjoy the provisions of Rule 5.8.1, regardless of whether or not such ammunition appears, for all intents and purposes, to be identical to official match ammunition.
  - 5.8.1.2. Official match ammunition purchased by competitors is deemed to be competitor equipment (see Section 5.7), therefore malfunctions will not be grounds for a reshoot and/or an appeal to Arbitration.
  - 5.8.1.3. Official match ammunition must not be restricted solely for sale to, and/or use by, competitors representing the host country and/or the vendor.
  - 5.8.1.4. Official match ammunition must be approved by the Regional Director of the Region in which the match is being held.
  - 5.8.1.5. Match Officials reserve the right to conduct chronograph or other tests on all and any ammunition, at any time, and a reason need not be given.
- 5.8.2. Where possible, match organizers (or their nominated vendor at the match) should make available a test firing bay, supervised by a Range Officer, where competitors can function test a small quantity of official match ammunition of the same batch through their firearm(s) prior to purchase.

## CHAPTER 6: Match Structure

### 6.1. General Principles

The following definitions are used for clarity:

#### 6.1.1. String

A separately timed and scored component of a Standard Exercise. Scores and penalties are recorded following completion of each string, and results achieved in each string are then tallied to produce a final stage result (also see Rule 9.5.5).

#### 6.1.2. Standard Exercise

A course of fire consisting of one or more separately timed component strings. Scores, with any penalties deducted, are accumulated on completion of the course of fire to produce the final stage results. The course of fire for each component string may require a specific shooting position, procedure and/or one or more mandatory reloads. Only one Standard Exercise of a maximum of 24 rounds is allowed in IPSC sanctioned Level IV or higher matches.

#### 6.1.3. Stage

A separately timed and scored component of a match.

#### 6.1.4. Match

Consists of a minimum of 2 stages. The total sum of individual stage results will be accumulated to declare a match winner. Each component stage must be designated exclusively to a single type of firearm (e.g. handgun stage or shotgun stage or rifle stage).

#### 6.1.5. Tournament

Consists of a single match where individual stages are assigned to one particular type of firearm (e.g. Stages 1-4 Handgun, Stages 5-8 Rifle, Stages 9-12 Shotgun). The total sum of individual stage results will be accumulated to declare a match winner.

#### 6.1.6. Grand Tournament

Consists of two or more firearm specific matches (e.g. a handgun match and a shotgun match, or a handgun match, a rifle match and a shotgun match). The individual match results achieved by a competitor in each component match will be used to declare an overall tournament winner, in accordance with the IPSC Grand Tournament Rules.

6.1.7. League

Consists of two or more IPSC matches of a single firearm type held at different locations and on different dates. The total sum of match results attained by each competitor at component matches specified by the league organizers will be accumulated to determine a league winner.

6.1.8. Shoot-Off

An event conducted separately from a match. Eligible competitors compete directly against each other by simultaneously shooting at separate but equal target arrays in a process of elimination (see Appendix E).

6.2. Match Divisions

- 6.2.1. IPSC Divisions recognize different firearms and equipment (see Appendix D). Each match must recognize at least one Division. When multiple Divisions are available in a match, each Division must be scored separately and independently, and match results must recognize a winner in each Division.
- 6.2.2. In IPSC sanctioned matches, the minimum number of competitors stipulated in Appendix A2 must compete in each Division for it to be recognized. If there are insufficient competitors in a Division, the Match Director may allow that Division to stand without official IPSC recognition.
- 6.2.3. Prior to the commencement of a match, each competitor must declare one Division for score, and Match Officials should check competitor equipment compliance with the declared Division, prior to the competitor making an attempt at any of the courses of fire. However competitors always remain subject to the provisions of Rule 6.2.5.1.
- 6.2.4. Subject to the prior approval of the Match Director, a competitor may enter a match in more than one Division. However, the competitor may compete for match score in only one Division, and that must be the first attempt in all cases. Any subsequent attempts in another Division will not count for match recognition.
- 6.2.5. Where a Division is unavailable or deleted, or where a competitor fails to declare a specific Division prior to the commencement of a match, the competitor will be placed in the Division which, in the opinion of the Range Master, most closely identifies with the competitor's equipment. If, in the opinion of the Range Master, no suitable Division is available, the competitor will shoot the match for no score.

- 6.2.5.1. However, if a competitor fails to satisfy the equipment or other requirements of a declared Division during a course of fire, the competitor will be placed in Open Division, if available, otherwise the competitor will shoot the match for no score. Competitors already registered in Open Division who fail to comply with the requirements of Open Division during a course of fire will shoot the match for no score.
- 6.2.5.2. A competitor who is classified or reclassified as above must be notified as soon as possible. The Range Master's decision on these matters is final.
- 6.2.6. A match disqualification incurred by a competitor, at any time during a match, will prevent the competitor from further participation in the match including any subsequent attempts in another Division. However, this is not retroactive. Any previous and complete match scores from another Division will be included for recognition and awards in that Division.
- 6.2.7. Recognition of a competitor in a specific Division will not preclude further recognition in a Category or from inclusion as member of a Regional or other team.
- 6.3. Match Categories
  - 6.3.1. IPSC matches may include different Categories within each Division to recognize different groups of competitors. A competitor may declare only one Category for a match or tournament.
  - 6.3.2. Failure to meet the requirements of the declared Category or failure to declare a Category prior to the start of the match will result in exclusion from that Category. Details of currently approved Categories and related requirements are listed in Appendix A2.
- 6.4. Regional Teams
  - 6.4.1. Subject to the availability of allocated slots, only one official Regional team in each Division and/or Division/Category may be selected on merit by each Region for IPSC Level IV or higher matches. Approved Category teams are specified by the IPSC Assembly (see Appendix A2).
    - 6.4.1.1. At Level IV matches, the only teams permitted are those representing Regions within the zone where the match is being held (e.g. at a European Championship, only teams representing Regions designated by IPSC as belonging to the European Zone can be fielded).
    - 6.4.1.2. At Level IV and higher matches, official Regional Teams must be "seeded", in accordance to how they placed at the same immediately preceding event.

- 6.4.2. An individual competitor's scores will be used exclusively for a single team in a match.
- 6.4.3. Teams must consist of a maximum of 4 members, however, only the final scores of the 3 highest scoring team members will be used to calculate team results.
- 6.4.4. If a member of a team retires from the match for any reason before completing all of the stages, scores attained by that competitor will continue to stand towards the team score, however, the affected team is not entitled to replace the retired team member.
- 6.4.5. A team member who is unable to commence a match, may be replaced prior to commencement by another competitor, subject to the approval of the Match Director.
- 6.4.6. If a member of a team is disqualified from a match, the disqualified member's scores will revert to zero for all courses of fire. Teams will not be entitled to replace a disqualified team member.
- 6.5. Competitor Status and Credentials
  - 6.5.1. All competitors must be individual members of the IPSC Region in which they normally reside. Residency is defined as the Region where the individual is ordinarily domiciled for a minimum of 183 days of the twelve months immediately preceding the month in which the match begins. Ordinarily domiciled condition is a physical presence test and does not relate to citizenship or to any address of convenience. The 183 days need not be consecutive or the most recent 183 days of the twelve month period. In any case, match organizers must not accept any competitor from a foreign Region unless the Regional Director of that Region has confirmed the competitor's eligibility to participate in the subject match.
    - 6.5.1.1. Competitors who ordinarily reside in a country or geographical area which is not affiliated to IPSC may join an IPSC affiliated Region and may compete under the auspices of that Region, subject to the approval of the IPSC Executive Council and the Regional Directorate of that Region. If a competitor's country or geographical area of residence subsequently applies for affiliation to IPSC, the competitor must become a member of that Region during the affiliation process.
  - 6.5.2. A competitor and/or team member may represent only the IPSC Region in which they reside, except as follows:

- 6.5.2.1. In respect of a competitor who resides in one Region, but who wishes to represent the Region of which they are a citizen, the Regional Directors for the Region of residence and the Region of citizenship must agree in writing prior to the commencement of the match.
- 6.5.2.2. A competitor who falls under the conditions of Rule 6.5.1.1 may represent the Region of which they are a member, subject to the prior written approval of the Regional Director.
- 6.5.3. At Regional and Continental Championships, only competitors who satisfy the residency requirements stated in Rule 6.5.1 are entitled to be recognized as the Regional or Continental Champion, by Division and/or by Division/Category, as the case may be. However when determining Regional or Continental Champions, match results of competitors from outside the applicable Region or Continent must not be deleted from the match results, which must remain wholly intact. For example:

Region 1 Open Division Championships

100% Competitor A - Region 2 (declared as Overall Match and Division Champion)

99% Competitor B - Region 6

95% Competitor C - Region 1 (declared as Region 1 Champion)

6.6. Competitor Scheduling and Squadding

- 6.6.1. Competitors must compete for score according to the published match and squadding schedule. A competitor who is not present at the scheduled time and date for any stage may not attempt that stage without the prior approval of the Match Director, failing which the competitor's score for that stage will be zero.
- 6.6.2. Only Match Officials, match sponsors and dignitaries, who are members in good standing of their Region of residence, and IPSC Officers (as defined in Section 6.1 of the IPSC Constitution) may compete for score in a "pre-match", subject to the prior approval of the Match Director. Scores attained in the "pre-match" may, at the discretion of the Match Director, be included in the overall match results provided dates of the "pre-match" are published in advance in the official match schedule. Competitors in the main match must not be restricted from viewing the pre-match.
  - 6.6.2.1. At Level IV or higher competitions, all members of the same official Regional Team must compete together in the same squad in the main match.

- 6.6.3. A match, tournament or league will be deemed to have started on the first day that competitors (including those specified above) shoot for score and will be deemed to have ended when the results have been declared final by the Match Director.
- 6.7. International Classification System ("ICS")
  - 6.7.1. The IPSC Executive Council may coordinate and publish dedicated regulations and procedures in order to manage and administer an International Classification System.
  - 6.7.2. Competitors seeking an international classification must use the approved courses of fire available from the IPSC website.

## CHAPTER 7: Match Management

### 7.1. Match Officials

The duties and terms of reference of Match Officials are defined as follows:

#### 7.1.1. Range Officer (“RO”)

The RO issues range commands, oversees competitor compliance with the written stage briefing and closely monitors safe competitor action. He also declares the time, scores and penalties achieved by each competitor and verifies that these are correctly recorded on the competitor's score sheet (under the authority of a Chief Range Officer and Range Master).

#### 7.1.2. Chief Range Officer (“CRO”)

The CRO is the primary authority over all persons and activities in the courses of fire under his control, and oversees the fair, correct and consistent application of these rules (under the authority of the Range Master).

#### 7.1.3. Stats Officer (“SO”)

The SO collects, sorts, verifies, tabulates and retains all score sheets and ultimately produces provisional and final results. Any incomplete or inaccurate score sheets must be promptly referred to the Range Master (under direct authority of the Range Master).

#### 7.1.4. Quartermaster (“QM”)

The QM distributes, repairs and maintains all range equipment (e.g. targets, patches, paint, props etc.), Range Officer appliances (e.g. timers, batteries, staplers, staples, clipboards etc.) and Range Officer rations (under direct authority of the Range Master).

#### 7.1.5. Range Master (“RM”)

The RM has overall authority over all persons and activities within the entire range, including range safety, the operation of all courses of fire and the application of these rules. All match disqualifications and appeals to arbitration must be brought to his attention. The Range Master is usually appointed by and works with the Match Director, however, in respect of IPSC sanctioned Level IV or higher matches, the appointment of the Range Master is subject to the prior written approval of the IPSC Executive Council.

7.1.6. Match Director (“MD”)

The MD handles overall match administration including squadding, scheduling, range construction, the coordination of all support staff and the provision of services. His authority and decisions will prevail with regard to all matters except in respect of matters in these rules which are the domain of the Range Master. The Match Director is appointed by the host organization and works with the Range Master.

7.2. Discipline of Match Officials

7.2.1. The Range Master has authority over all Match Officials other than the Match Director (except when the Match Director is actually participating as a competitor at the match), and is responsible for decisions in matters concerning conduct and discipline.

7.2.2. In the event that a Match Official is disciplined, the Range Master must send a report of the incident and details of the disciplinary action to the Match Official's Regional Director, the Regional Director of the Region hosting the match, and to the President of the International Range Officers Association (IROA).

7.2.3. A Match Official who is disqualified from a match for a safety infraction while competing will continue to be eligible to serve as a Match Official for the match. The Range Master will make any decision related to an official's participation.

7.3. Appointment of Officials

7.3.1. Match organizers must, prior to commencement of a match, appoint a Match Director and a Range Master to carry out the duties detailed in these rules. The nominated Range Master should preferably be the most competent and experienced certified Range Official present (also see Rule 7.1.5). For Level I and II matches a single person may be appointed to be both the Match Director and the Range Master.

7.3.2. References in these rules to Range Officials (e.g. "Range Officer", "Range Master" etc.), mean personnel who have been officially appointed by match organizers to actually serve in an official capacity at the match. Persons who are certified Range Officials, but who are actually participating in the match as regular competitors, have no standing or authority as Range Officials for that match. Such persons should therefore not participate in the match wearing garments bearing Range Official insignia.

## CHAPTER 8: The Course of Fire

### 8.1. Handgun Ready Conditions

The ready condition for handguns will normally be as stated below. However, in the event that a competitor fails to load the chamber when permitted by the written stage briefing, whether inadvertently or intentionally, the Range Officer must not take any action, as the competitor is always responsible for the handling of the handgun.

#### 8.1.1. Revolvers:

- 8.1.1.1. Single Action: hammer fully down on an empty chamber or, if a safety notch is fitted, hammer down over a loaded chamber (transfer bar designs excepted).
- 8.1.1.2. Double Action: hammer fully down and all chambers may be loaded.
- 8.1.1.3. Non-traditional revolvers (e.g. those which operate in a "self-loading" mode) are subject to the following rules and/or any other requirements stipulated by the Range Master (also see Appendix D5).

#### 8.1.2. Self-loading Pistols:

- 8.1.2.1. "Single action" - chamber loaded, hammer cocked, with external safety engaged.
- 8.1.2.2. "Double action" - chamber loaded, hammer fully down or decocked.
- 8.1.2.3. "Selective action" - chamber loaded hammer fully down or decocked, or chamber loaded and hammer cocked with external safety engaged (see Divisions in Appendix D). For both this Rule and Rule 8.1.2.1, the term "safety" means the primary visible safety lever on the handgun (e.g. the thumb safety on a "1911" genre handgun). In the event of doubt, the Range Master is the final authority on this matter.
- 8.1.2.4. If a handgun has a decocking lever, that alone must be used to decock the handgun, without touching the trigger. If a handgun does not have a decocking lever, the hammer must be safely and manually lowered all the way forward (i.e. not just to a "half-cock notch" or to another similar intermediary position).

- 8.1.3. Courses of fire may require ready conditions which are different to those stated above. In such cases, the required ready condition must be clearly stated in the written stage briefing. When a handgun ready condition requires a handgun be prepared with an empty chamber (or cylinder), the slide of the handgun must be fully forward (or the cylinder must be fully closed) and the hammer, if fitted, must be fully down.
- 8.1.4. Unless complying with a Division requirement (see Appendix D), a competitor must not be restricted on the number of rounds to be loaded or reloaded in a handgun. Written stage briefings may only stipulate when the firearm is to be loaded or when mandatory reloads are required, when permitted under Rule 1.1.5.2.
- 8.1.5. In respect of handguns used at IPSC matches, the following definitions apply:
  - 8.1.5.1. "Single Action" means activation of the trigger causes a single action to occur (i.e. the hammer or striker falls).
  - 8.1.5.2. "Double Action" means activation of the trigger causes more than a single action to occur (i.e. the hammer or striker rises or retracts, then falls).
  - 8.1.5.3. "Selective Action" means that the handgun can be operated in either "Single Action" or "Double Action" modes.

## 8.2. Competitor Ready Condition

This designates when, under the direct command of a Range Officer:

- 8.2.1. The handgun is prepared as specified in the written stage briefing, and is in compliance with the requirements of the relevant Division.
- 8.2.2. The competitor assumes the start position as specified in the written stage briefing. Unless otherwise specified, the competitor must stand erect, facing downrange, with arms hanging naturally by the sides see Appendix F3. A competitor who attempts or completes a course of fire where an incorrect start position was used may be required by a Range Official to reshoot the course of fire.
- 8.2.3. A course of fire must never require or allow a competitor to touch or hold a handgun, loading device or ammunition after the "Standby" command and before the "Start Signal" (except for unavoidable touching with the lower arms).
- 8.2.4. A course of fire must never require the competitor to draw a handgun from the holster with the weak hand.

8.2.5. A course of fire must never require the competitor to re-holster a handgun after the start signal. However, a competitor may re-holster provided this is accomplished safely, and the handgun is either unloaded or in a ready condition stated in Section 8.1. Violations will be subject to match disqualification (see Rule 10.5.11).

### 8.3. Range Communication

The approved range commands and their sequence are as follows:

#### 8.3.1. "Load And Make Ready"

(or "Make Ready" for starts with an unloaded firearm). This command signifies the start of "the Course of Fire". Under the direct supervision of the Range Officer the competitor must face down range, or in a safe direction as specified by the Range Officer, fit eye and ear protection, and prepare the firearm in accordance with the written stage briefing. The competitor must then assume the required start position. At this point, the Range Officer will proceed.

8.3.1.1. Once the "Load and Make Ready" (or "Make Ready" for starts with an unloaded firearm) command has been given, the competitor must not move away from the start location prior to issuance of the "Start Signal" without the prior approval, and under the direct supervision, of the Range Officer. Violation will result in a warning for the first offense and may result in the application of Rule 10.6.1 for a subsequent offense in the same match.

#### 8.3.2. "Are You Ready?"

The lack of any negative response from the competitor indicates that he fully understands the requirements of the course of fire and is ready to proceed. If the competitor is not ready at the "Are You Ready?" command, he must state "Not Ready". It is suggested that when the competitor is ready he should assume the required start position to indicate his readiness to the Range Officer.

#### 8.3.3. "Standby"

This command should be followed by the start signal within 1 to 4 seconds (also see Rule 10.2.6).

#### 8.3.4. "Start Signal"

The signal for the competitor to begin their attempt at the course of fire. If a competitor fails to react to a start signal, for any reason, the Range Officer will confirm that the competitor is ready to attempt the course of fire, and will resume the range commands from "Are You Ready?"

8.3.4.1. In the event that a competitor inadvertently begins shooting prematurely ("false start"), the Range Officer will, as soon as possible, stop and restart the competitor once the course of fire has been restored.

8.3.5. "Stop"

Any Range Officer assigned to a stage may issue this command at any time during the course of fire. The competitor must immediately cease firing, stop moving and wait for further instructions from the Range Officer.

8.3.5.1. When conducting Standard Exercises, and/or when two or more courses of fire share a common shooting bay or area, Range Officials may issue other interim commands on completion of the first string or COF, in order to prepare the competitor for the second and subsequent strings or COF (e.g. "Reload if required and holster"). Any such interim commands to be used must be clearly stated in the written stage briefing.

8.3.6. "If You Are Finished, Unload And Show Clear"

If the competitor has finished shooting, he must lower his handgun and present it for inspection by the Range Officer with the muzzle pointed down range, magazine removed, slide locked or held open, and chamber empty. Revolvers must be presented with the cylinder swung out and empty.

8.3.7. "If Clear, Hammer Down, Holster"

After issuance of this command, the competitor must not resume shooting (see Rule 10.6.1). While continuing to point the handgun safely downrange, the competitor must perform a final safety check of the handgun as follows:

8.3.7.1. Self-loaders - release the slide and pull the trigger (without touching the hammer or decocker, if any).

8.3.7.2. Revolvers - close the empty cylinder (without touching the hammer, if any).

8.3.7.3. If the gun proves to be clear, the competitor must holster his handgun. Once the competitor's hands are clear of the holstered handgun, the course of fire is deemed to have ended.

8.3.7.4. If the gun does not prove to be clear, the Range Officer will resume the commands from Rule 8.3.6 (also see Rule 10.4.3).

8.3.8. "Range Is Clear"

Competitors or Range Officials must not move forward of, or away from, the firing line or final shooting location until this declaration is given by the Range Officer. Once the declaration is made, officials and competitors may move forward to score, patch, reset targets etc.

#### 8.4. Loading, Reloading or Unloading During a Course of Fire

8.4.1. When loading, reloading or unloading during a course of fire, the competitor's fingers must be visibly outside the trigger guard except where specifically permitted (see Rule 8.1.2.4 and 8.3.7.1), and the firearm must be pointed safely down range or in another safe direction authorized by a Range Officer (see Section 10.5).

#### 8.5. Movement

8.5.1. Except when the competitor is actually aiming or shooting at targets, all movement must be accomplished with the fingers visibly outside the trigger guard and the safety should be engaged. The firearm must be pointed in a safe direction. "Movement" is defined as any of the actions below:

8.5.1.1. Taking more than one step in any direction.

8.5.1.2. Changing shooting position (e.g. from standing to kneeling, from seated to standing etc.).

#### 8.6. Assistance or Interference

8.6.1. No assistance of any kind can be given to a competitor during a course of fire, except that any Range Officer assigned to a stage may issue safety warnings to a competitor at any time. Such warnings will not be grounds for the competitor to be awarded a reshoot.

8.6.1.1. Competitors confined to wheelchairs or similar devices may be given special dispensation by the Range Master in respect of mobility assistance, however, the provisions of Rule 10.2.11 may still apply, at the Range Master's discretion.

8.6.2. Any person providing assistance or interference to a competitor during a course of fire (and the competitor receiving such assistance) may, at the discretion of a Range Officer, incur a procedural penalty for that stage and/or be subject to Section 10.6.

8.6.3. In the event that inadvertent contact from the Range Officer or another external influence has interfered with the competitor during a course of fire, the Range Officer may offer the competitor a reshoot of the course of fire. The competitor must accept or decline the offer prior to seeing either the time or the score from the initial attempt. However, in the event that the competitor commits a safety infraction during any such interference, the provisions of Section 10.3 may still apply.

## 8.7. Sight Pictures and Range Inspection

- 8.7.1. Competitors are always prohibited from taking a sight picture with a loaded firearm prior to the start signal. Violation will result in a warning for the first occurrence and one procedural penalty for each subsequent occurrence in the same match.
- 8.7.2. If match organizers also prohibit taking a sight picture with an unloaded firearm prior to the start signal, competitors must be advised in the written stage briefing. Violation will result in a warning for the first occurrence and one procedural penalty for each subsequent occurrence in the same match.
- 8.7.3. When permitted, competitors taking a sight picture with an unloaded firearm prior to the start signal must only do so on a single target, to verify that their sights are prepared as required. Competitors who test a targeting sequence or a shooting position while taking a sight picture will incur one procedural penalty per occurrence.
- 8.7.4. Competitors are prohibited from using any sighting aid (e.g. the whole or part of an imitation or replica firearm, any part of a real firearm including any accessories thereof etc.), except for their own hands, while conducting their inspection ("walkthrough") of a course of fire. Violations will incur one procedural penalty per occurrence (also see Rule 10.5.1).
- 8.7.5. No person is permitted to enter or move through a course of fire without the prior approval of a Range Officer assigned to that course of fire or the Range Master. Violators will incur a warning for the first offense but may be subject to the provisions of Section 10.6 for subsequent offenses.

## CHAPTER 9: Scoring

### 9.1. General Regulations

#### 9.1.1. Approaching Targets

While scoring is in progress, competitors or their delegate must not approach any target closer than 1 meter without the authorization of the Range Officer. Violation will result in a warning for the first offense, but the competitor or his delegate may, at the discretion of the Range Officer, incur a procedural penalty for subsequent occurrences in the same match.

#### 9.1.2. Touching Targets

While scoring is in progress competitors or their delegate must not touch, gauge or otherwise interfere with any target without the authorization of the Range Officer. Should a Range Officer deem that a competitor or their delegate has influenced or affected the scoring process due to such interference, the Range Officer may:

9.1.2.1. Score the affected target as a missed target; or

9.1.2.2. Impose penalties for any affected no-shoots.

#### 9.1.3. Prematurely Patched Targets

If a target is prematurely patched or taped, preventing the determination of the actual score, the Range Officer must order the competitor to reshoot the course of fire.

#### 9.1.4. Unrestored Targets

If, following completion of a course of fire by a previous competitor, one or more targets have not been properly patched or taped for the competitor being scored, the Range Officer must judge whether or not an accurate score can be determined. If there are extra scoring hits or questionable penalty hits thereon, and it is not obvious which hits were made by the competitor being scored, the affected competitor must be ordered to reshoot the course of fire.

9.1.4.1. In the event that patches or tape applied to a restored paper target are accidentally blown off by wind, muzzle blast or another reason, and it is not obvious to the Range Officer which hits were made by the competitor being scored, the competitor will be required to reshoot the course of fire.

#### 9.1.5. Impenetrable

The scoring area of all IPSC scoring targets and no-shoots is deemed to be impenetrable. If a:

- 
- 9.1.5.1. Bullet strikes wholly within the scoring area of a paper target, and continues on to strike the scoring area of another paper target, the hit on the subsequent paper target will not count for score or penalty, as the case may be.
  - 9.1.5.2. Bullet strikes wholly within the scoring area of a paper target, and continues on to hit or strike down a metal target, this will be treated as range equipment failure. The competitor will be required to reshoot the course of fire, after it has been restored.
  - 9.1.5.3. Bullet strikes partially within the scoring area of a paper or metal target, and continues on to strike the scoring area of another paper target, the hit on the subsequent paper target will also count for score or penalty, as the case may be.
  - 9.1.5.4. Bullet strikes partially within the scoring area of a paper or metal target, and continues on to strike down (or hit the scoring area of) another metal target, the fallen (or hit on the) subsequent metal target will also count for score or penalty, as the case may be.
- 9.1.6. Hard Cover
- Unless specifically described as "soft cover" (see Rule 4.1.4.2) in the written stage briefing, all props, walls, barriers, vision screens and other obstacles are deemed to be impenetrable "hard cover". If a:
- 9.1.6.1. Bullet strikes wholly within hard cover, and continues on to strike any scoring paper target or no-shoot, that shot will not count for score or penalty, as the case may be. If it cannot be determined which hit(s) on a scoring paper target or no-shoot are the result of shots fired through hard cover, the scoring paper target or no-shoot will be scored by ignoring the applicable number of highest scoring hit(s).
  - 9.1.6.2. Bullet strikes wholly within hard cover, and continues on to hit or strike down a metal target, this will be treated as range equipment failure (see Section 4.6). The competitor will be required to reshoot the course of fire, after it has been restored.
  - 9.1.6.3. Bullet strikes partially within hard cover, and continues on to strike the scoring area of a paper target, the hit on that paper target will count for score or penalty, as the case may be.
  - 9.1.6.4. Bullet strikes partially within hard cover, and continues on to strike down a scoring metal target, the fallen target will count for score. If a bullet strikes partially within hard cover, and continues on to strike down or hit a metal no-shoot, the fallen no-shoot or hit thereon will count for penalty.
-

---

### 9.1.7. Target sticks

Target sticks are neither Hard Cover nor Soft Cover. Shots which have passed wholly or partially through target sticks and which hit a paper or metal target will count for score or penalty, as the case may be.

## 9.2. Scoring Methods

9.2.1. The written stage briefing for each course of fire must specify one of the following scoring methods:

9.2.2. "Comstock" - Unlimited time stops on the last shot, unlimited number of shots to be fired, stipulated number of hits per target to count for score.

9.2.2.1. A competitor's score is calculated by adding the highest value stipulated number of hits per target, minus penalties, divided by the total time (recorded to two decimal places) taken by the competitor to complete the course of fire, to arrive at a hit factor. The overall stage results are factored by awarding the competitor with the highest hit factor the maximum points available for the course of fire, with all other competitors ranked relatively below the stage winner.

9.2.3. "Virginia Count" - Unlimited time stops on the last shot, limited number of shots to be fired, stipulated number of hits per target to count for score.

9.2.3.1. A competitor's score is calculated by adding the highest value stipulated number of hits per target, minus penalties, divided by the total time (recorded to two decimal places) taken by the competitor to complete the course of fire, to arrive at a hit factor. The overall stage results are factored by awarding the competitor with the highest hit factor the maximum points available for the course of fire, with all other competitors ranked relatively below the stage winner.

9.2.3.2. Virginia Count must use paper targets exclusively, and must only be used for Standard Exercises, Classifiers or Short Courses.

9.2.3.3. Virginia Count must not be used in Level IV or higher matches except in respect of a Standard Exercise (see Rule 6.1.2).

9.2.4. "Fixed Time" - Limited time, limited number of shots to be fired, stipulated number of overall hits to count for score.

9.2.4.1. A competitor's score is calculated by adding the highest value stipulated number of required hits, minus penalties. The overall stage results are not factored, and competitors are ranked by the actual net points achieved by them.

- 
- 9.2.4.2. Fixed Time must use paper targets exclusively and they should, where possible, be disappearing targets.
  - 9.2.4.3. Fixed Time must only be used for Standard Exercises, Classifiers or Short Courses.
  - 9.2.4.4. Fixed Time must not be used in Level IV or higher matches except in respect of a Standard Exercise (see Rule 6.1.2).
  - 9.2.4.5. Fixed Time courses of fire do not incur failure to engage or miss penalties.
- 9.2.5. Stage results must rank competitors within the relevant Division in descending order of individual stage points achieved, calculated to 4 decimal places.
- 9.2.6. Match results must rank competitors within the relevant Division in descending order of the combined total of individual stage points achieved, calculated to 4 decimal points.
- 9.3. Scoring Ties
- 9.3.1. If, in the opinion of the Match Director, a tie in match results must be broken, the affected competitors must shoot one or more courses of fire, nominated or created by the Match Director, until the tie is broken. The result of a tiebreaker will only be used to determine the final placing of the affected competitors, and their original match points will remain unchanged. Ties must never be broken by chance.
- 9.4. Scoring and Penalty Values
- 9.4.1. Hits on IPSC targets and no shoots will be scored in accordance with the values approved by the IPSC Assembly. (See Appendices B and C and below).
- 9.4.2. Each hit visible on the scoring area of a paper no-shoot will be penalized minus 10 points, up to a maximum of 2 hits per no-shoot.
- 9.4.3. Each hit visible on the scoring area of a metal no-shoot will be penalized minus 10 points, up to a maximum of 2 hits per no-shoot, regardless of whether or not it is designed to fall (see Rules 4.3.1.7 and 4.3.1.8).
- 9.4.4. Each miss will be penalized minus 10 points, except in the case of disappearing targets (see Rules 9.2.4.5 and 9.9.2).
- 9.4.5. In a Virginia Count Course of Fire or a Fixed Time Course of Fire:
- 9.4.5.1. Extra shots (i.e. shots fired in excess of the number specified in a component string or stage), will each incur one procedural penalty. Additionally, during scoring, no more than the specified number and highest scoring hits will be awarded.

- 9.4.5.2. Extra hits (i.e. hits on the scoring area of scoring paper targets in excess of the total number specified in the stage), will each incur one procedural penalty. Note that hits on hard cover and/or no-shoots are not treated as Extra Hits.
- 9.4.5.3. If hits in excess of the total number required are visible on one or more targets, but the competitor has not fired more than the number of shots required (i.e. Extra Shots), Extra Hit penalties will not apply. If it is not obvious which hits were made by the competitor, he must be ordered to reshoot the string or COF, as the case may be.
- 9.4.6. In a Fixed Time Course of Fire:
  - 9.4.6.1. Overtime shots are shots fired at the targets after the signal to cease fire has been given. Overtime shots will not count for score.
  - 9.4.6.2. Where static scoring paper targets are used, it is assumed that overtime shots result in the highest value hits visible on the targets, so these are ignored for scoring purposes. For example, on a stage with 1xA, 6xC and 1xD hits, where 2 overtime shots have been fired, the 2 highest hits (i.e. 1xA and 1xC) are ignored, with the final score being 5xC and 1xD hits.
  - 9.4.6.3. Where static paper no-shoots are used, it is assumed that all hits occurred within the specified time, and will count in the scoring process, subject to Rule 9.4.2.
- 9.5. Scoring Policy
  - 9.5.1. Unless otherwise specified in the written stage briefing, scoring paper targets must be shot with a minimum of one round each, with the best two hits to score. Scoring metal targets must be shot with a minimum of one round each and must fall to score.
  - 9.5.2. If the bullet diameter of a hit on a scoring target touches the scoring line between two scoring areas, or the line between the non-scoring border and a scoring area, or if it crosses multiple scoring areas, it will be scored the higher value.
  - 9.5.3. If a bullet diameter touches the scoring area of both a scoring target and a no-shoot, it will earn the score and incur the penalty.
  - 9.5.4. Radial tears radiating outwards from the diameter of a bullet hole will not count for score or penalty.

- 9.5.4.1. Enlarged holes in paper targets which exceed the competitor's bullet diameter will not count for score or penalty unless there is visible evidence within the remnants of the hole (e.g. a grease mark, striations or a "crown" etc.), to eliminate a presumption that the hole was caused by a ricochet or splatter.
- 9.5.5. The minimum score for a course of fire or string will be zero.
- 9.5.6. A competitor who fails to shoot at the front of each scoring target in a course of fire with at least one round will incur one procedural penalty per target for failure to engage the target, as well as appropriate penalties for misses (see Rule 10.2.7).
- 9.5.7. Hits visible on a scoring paper target or no-shoot, which are the result of shots fired through the rear of a paper target or no-shoot, and/or hits which fail to create a clearly distinguishable hole through the front of a scoring paper target or no shoot, will not count for score or penalty, as the case may be.
- 9.6. Score Verification and Challenge
  - 9.6.1. After the Range Officer has declared "Range is Clear", the competitor or their delegate will be allowed to accompany the official responsible for scoring to verify the scoring.
  - 9.6.2. The Range Official responsible for a course of fire may stipulate that the scoring process will begin while a competitor is actually completing a course of fire. In such cases, the competitor's delegate must be entitled to accompany the official responsible for scoring in order to verify the scoring. Competitors must be advised of this procedure during the squad briefing.
  - 9.6.3. A competitor (or his delegate) who fails to verify a target during the scoring process loses all right of appeal in respect of scoring that target.
  - 9.6.4. Any challenge to a score or penalty must be appealed to the Range Officer by the competitor (or his delegate) prior to the subject target being painted, patched, or reset, failing which such challenges will not be accepted.
  - 9.6.5. In the event that the Range Officer upholds the original score or penalty and the competitor is dissatisfied, he may appeal to the Chief Range Officer and then to the Range Master for a ruling.
  - 9.6.6. The Range Master's ruling in respect of the scoring of hits on targets and no shoots will be final. No further appeals are allowed with respect to such scoring decisions.

- 9.6.7. During a scoring challenge, the subject target(s) must not be patched, taped or otherwise interfered with until the matter has been settled. The Range Officer may remove a disputed paper target from the course of fire for further examination to prevent any delay in the match. Both the competitor and the Range Officer must sign the target and clearly indicate which hit(s) is (are) subject to challenge.
- 9.6.8. Scoring overlays approved by the Range Master must be used exclusively, as and when required, to verify and/or determine the applicable scoring zone of hits on paper targets.
- 9.7. Score Sheets
- 9.7.1. The Range Officer must enter all information (including any warnings given) on each competitor's score sheet prior to signing it. After the Range Officer has signed the score sheet, the competitor must add his own signature in the appropriate place. Electronic score sheet signatures will be acceptable if approved by the Regional Directorate. Whole numbers should be used to record all scores or penalties. The elapsed time taken by the competitor to complete the course of fire must be recorded to 2 decimal places in the appropriate place.
- 9.7.2. If corrections to the score sheet are required, these will be clearly entered onto the original and other copies of the competitor's score sheets. The competitor and the Range Officer should initial any corrections.
- 9.7.3. Should a competitor refuse to sign or initial a score sheet, for any reason, the matter must be referred to the Range Master. If the Range Master is satisfied that the course of fire has been conducted and scored correctly the unsigned score sheet will be submitted as normal for inclusion in the match scores.
- 9.7.4. A score sheet signed by both a competitor and a Range Officer is conclusive evidence that the course of fire has been completed, and that the time, scores and penalties recorded on the score sheet, are accurate and uncontested. The signed score sheet is deemed to be a definitive document and, with the exception of the mutual consent of the competitor and the signatory Range Officer, or due to an arbitration decision, the score sheet will only be changed to correct arithmetical errors or to add procedural penalties under Rule 8.6.2.
- 9.7.5. If a score sheet is found to have insufficient or excess entries, or if the time has not been recorded on the score sheet, the competitor will be required to reshoot the course of fire.
- 9.7.6. In the event that a reshoot is not possible or permissible for any reason, the following actions will prevail:

- 
- 9.7.6.1. If the time is missing, the competitor will receive a zero score for the course of fire.
  - 9.7.6.2. If insufficient hits or misses have been recorded on the score sheet, those which have been recorded will be deemed complete and conclusive.
  - 9.7.6.3. If excessive hits or misses have been recorded on the score sheet, the highest value scoring hits recorded will be used.
  - 9.7.6.4. Procedural penalties recorded on the score sheet will be deemed complete and conclusive, except where Rule 8.6.2 applies.
  - 9.7.6.5. If the identity of the competitor is missing from a score sheet, it must be referred to the Range Master, who must take whatever action he deems necessary to rectify the situation.
- 9.7.7. In the event that an original score sheet is lost or otherwise unavailable, the competitor's duplicate copy, or any other written or electronic record acceptable to the Range Master, will be used. If the competitor's copy, or any other written or electronic record, is unavailable, or is deemed by the Range Master to be insufficiently legible the competitor will be required to reshoot the course of fire. If the Range Master deems that a reshoot is not possible for any reason, the competitor will incur a zero time and score for the affected course of fire.
- 9.8. Scoring Responsibility
- 9.8.1. Each competitor is responsible to maintain an accurate record of their scores to verify the lists posted by the Stats Officer.
  - 9.8.2. After all competitors have completed a match, the provisional stage results must be published and posted in a conspicuous place at the shooting range by the Stats Officer for the purpose of verification by competitors.
  - 9.8.3. If a competitor detects an error in the provisional results at the end of the match, they must file an appeal with the Stats Officer not later than 1 hour after the results are posted. If the appeal is not filed within the time limit, the posted scores will stand and the appeal will be dismissed.
  - 9.8.4. Competitors who are scheduled (or otherwise authorized by a Match Director) to complete all courses of fire in a match in a period of time less than the full duration of the match (e.g. 1 day format in a 3 day match etc.), are required to check their provisional match results in accordance with the special procedures and time limits specified by the Match Director (e.g. via a website), failing which scoring appeals will not be accepted. The relevant procedure must be published in advance in match literature and/or by way of a notice posted in a conspicuous place at the shooting range prior to commencement of the match (also see Section 6.6).

## 9.9. Scoring of Moving Targets

Moving targets will be scored in accordance with the following:

- 9.9.1. Moving targets which present at least a portion of the highest scoring area when at rest (either before or after initial activation), or which continuously appear and disappear for the duration of a competitor's attempt at a COF, will always incur failure to engage and/or miss penalties except when Rule 9.2.4.5 applies.
- 9.9.2. Moving targets, which do not comply with the above criteria, will not incur failure to engage or miss penalties unless a competitor fails to activate the mechanism which initiates the target movement.
- 9.9.3. Stationary targets which become partially or wholly concealed by action of a moving no-shoot or vision barrier are subject to the same criteria above in respect of the application of failure to engage and/or miss penalties.

## 9.10. Official Time

- 9.10.1. Only the timing device operated by a Range Officer must be used to record the official elapsed time of a competitor's attempt at a course of fire. If a timing device is faulty, a competitor whose attempt cannot be credited with an accurate time will be required to reshoot the stage.
- 9.10.2. If, in the opinion of an Arbitration Committee, the time credited to a competitor for a course of fire is deemed to be unrealistic, the competitor will be required to reshoot the course of fire (see Rule 9.7.4).
- 9.10.3. A competitor who reacts to a start signal but, for any reason, does not continue their attempt at the course of fire and fails to have an official time recorded on the timing device operated by the Range Officer, will be given a zero time and zero score for that course of fire.

## 9.11. Scoring Programs

- 9.11.1. The scoring programs approved by IPSC are the Match Scoring System (MSS) and Windows® Match Scoring System (WinMSS). No other scoring program must be used for any IPSC sanctioned match without the prior written approval of the Regional Director of the host Region. In the case of MSS and WinMSS the most recent versions of the scoring programs available from the IPSC website are to be used.

## CHAPTER 10: Penalties

### 10.1. Procedural Penalties - General Regulations

- 10.1.1. Procedural penalties are imposed when a competitor fails to comply with procedures specified in a written stage briefing. The Range Officer imposing the procedural penalties must clearly record the number of penalties, and the reason why they were imposed, on the competitor's score sheet.
- 10.1.2. Procedural penalties are assessed at minus 10 points each.
- 10.1.3. A competitor disputing the application or number of procedural penalties may appeal to the Chief Range Officer and/or Range Master. A competitor who continues to be aggrieved may then lodge an appeal for arbitration.
- 10.1.4. Procedural penalties cannot be nullified by further competitor action. For example, a competitor who fires a shot at a target while faulting a line will still incur the applicable penalties even though he subsequently shoots at the same target while not faulting the line.

### 10.2. Procedural Penalties - Specific Examples

- 10.2.1. A competitor who fires shots while any part of their body is touching the ground beyond a Fault Line will receive 1 procedural penalty for each occurrence. However, if the competitor has gained a significant advantage on any target(s) while faulting, the competitor may instead be assessed 1 procedural penalty for each shot fired at the subject target(s) while faulting. No penalty is assessed if a competitor does not fire any shots while faulting a line.
- 10.2.2. A competitor who fails to comply with a procedure specified in the written stage briefing will incur 1 procedural penalty for each occurrence. However, if a competitor has gained a significant advantage during noncompliance, the competitor may be assessed 1 procedural penalty for each shot fired, instead of a single penalty (e.g. firing multiple shots contrary to the required position or stance).
- 10.2.3. Where multiple penalties are assessed in the above cases, they must not exceed the maximum number of scoring hits that can be attained by the competitor. For example, a competitor who gains an advantage while faulting a Fault Line where only 4 metal targets are visible will receive 1 procedural penalty for each shot fired while faulting, up to a maximum of 4 procedural penalties, regardless of the number of shots actually fired.
- 10.2.4. A competitor who fails to comply with a mandatory reload will incur 1 procedural penalty for each shot fired after the point where the reload was required until a reload is performed.

- 10.2.5. In a Cooper Tunnel, a competitor who disturbs one or more pieces of the overhead material will receive 1 procedural penalty for each piece of overhead material which falls. Overhead material which falls as a result of the competitor bumping or striking the uprights, or as a result of muzzle gases or recoil, will not be penalized.
- 10.2.6. A competitor who is creeping (e.g. moving hands towards the firearm, a reloading device or ammunition) or physically moving to a more advantageous shooting position, posture or stance after the "Standby" command and prior to issuance of the start signal, will incur 1 procedural penalty. If the Range Officer can stop the competitor in time, a warning will be issued for the first offense and the competitor will be restarted.
- 10.2.7. A competitor who fails to engage any scoring target with at least one round will incur 1 procedural penalty per target, plus the applicable number of misses, except where the provisions of Rules 9.2.4.5 or 9.9.2 apply.
- 10.2.8. If a course of fire stipulates shooting strong or weak hand only, a competitor will not be penalized for using the other hand (i.e. the other arm from the shoulder to the hand) to disengage an external safety, to reload or to safely correct a malfunction. However, the competitor will be issued 1 procedural penalty per shot fired while:
- 10.2.8.1. Touching the handgun with the other hand except as permitted above;
  - 10.2.8.2. Using the other hand to support the handgun, wrist or shooting arm while firing shots;
  - 10.2.8.3. Using the other hand on a barricade or another prop to increase stability while firing shots.
- 10.2.9. A competitor who leaves a shooting location may return and shoot again from the same location provided they do so safely. However, written stage briefings for Classifiers, Standard Exercises and Level I & II matches may prohibit such actions, in which case 1 procedural penalty per shot fired will apply.
- 10.2.10. Not Applicable.
- 10.2.11. Special penalty: A competitor unable to fully execute any part of a course of fire due to incapacity or injury may, prior to making his attempt at the course of fire, request that the Range Master apply a penalty in lieu of the stated course requirement.

10.2.11.1. If the request is approved by the Range Master, a minimum of one procedural penalty, up to a maximum penalty of 20% of the competitor's points "as shot" (rounded up to the nearest whole number), will be deducted from the competitor's score. For example, if 100 points are available in the course of fire and the competitor actually scores 90 points, the special penalty is a deduction of 18 points. However, the Range Master may waive any or all procedural penalties in respect of a competitor who has a significant physical disability prior to the competitor making his attempt at the course of fire.

### 10.3. Match Disqualification - General Regulations

10.3.1. A competitor who commits a safety infraction or any other prohibited activity during an IPSC match will be disqualified from that match, and will be prohibited from attempting any remaining courses of fire in that match regardless of the schedule or physical layout of the match.

10.3.2. When a match disqualification is issued, the Range Officer must record the reasons for the disqualification, and the time and date of the incident, on the competitor's score sheet, and the Range Master must be notified as soon as possible.

10.3.3. Scores for a competitor who has received a match disqualification must not be deleted from match results, and match results must not be declared final by the Match Director, until the time limit prescribed in Rule 11.3.1 has passed, provided no appeal to arbitration on any matter has been submitted to the Range Master (or his delegate).

10.3.4. If an appeal to arbitration is submitted within the time limit prescribed in Rule 11.3.1, the provisions of Rule 11.3.2 will prevail.

10.3.5. Scores for a competitor who has completed a "pre-match" or main match without a match disqualification will not be affected by a match disqualification received while that competitor is participating in a ShootOff or other side match.

### 10.4. Match Disqualification - Accidental Discharge

A competitor who causes an accidental discharge must be stopped by a Range Officer as soon as possible. An accidental discharge is defined as follows:

10.4.1. A shot, which travels over a backstop, a berm or in any other direction, specified in the written stage briefing by the match organizers as being unsafe. Note that a competitor who legitimately fires a shot at a target, which then travels in an unsafe direction, will not be disqualified, but the provisions of Section 2.3 may apply.

- 
- 10.4.2. A shot which strikes the ground within 3 meters of the competitor, except when shooting at a paper target closer than 3 meters to the competitor. A bullet which strikes the ground within 3 meters of the competitor due to a "squib" load is exempt from this rule.
- 10.4.3. A shot which occurs while preparing to or while actually loading, reloading or unloading a firearm. This includes any shot fired during the procedures outlined in Rule 8.3.7.
- 10.4.3.1. Exception - a detonation, which occurs while unloading a firearm, is not considered a shot or discharge subject to a match disqualification, however, Rule 5.1.6 may apply.
- 10.4.4. A shot which occurs during remedial action in the case of a malfunction.
- 10.4.5. A shot which occurs while transferring a handgun between hands.
- 10.4.6. A shot which occurs during movement, except while actually shooting at targets.
- 10.4.7. A shot fired at a metal target from a distance of less than 7 meters, measured from the front of the target to the nearest part of the competitor's body in contact with the ground (see Rule 2.1.3).
- 10.4.8. Not Applicable.
- 10.4.9. Exception: When it can be established that the cause of the discharge is due to a broken or defective part of the firearm, the competitor has not committed any safety infraction in this Section, and a match disqualification will not be invoked, however, the competitor's scores for that course of fire will be zero.
- 10.4.9.1. The firearm must be immediately presented for inspection to the Range Master or his delegate, who will inspect the firearm and carry out any tests necessary to establish that a broken or defective part caused the discharge. A competitor may not later appeal a match disqualification for an accidental discharge due to a broken or defective part if they fail to present the firearm for inspection prior to leaving the course of fire.

## 10.5. Match Disqualification - Unsafe Gun Handling

Examples of unsafe gun handling include, but are not limited to:

- 10.5.1. Handling a firearm at any time except when in a designated safety area or when under the supervision of, and in response to a direct command issued by, a Range Officer. The expression "handling a firearm" includes holstering or unholstering a firearm, whether or not the firearm is visible (e.g. while concealed by a protective cover, etc.) together with adding or removing a firearm to/from the competitor's person whether or not the firearm is wholly or partially holstered.

- 
- 10.5.2. Allowing the muzzle of a firearm to point uprange, or past the default, or specific safe angles of fire during a course of fire, (limited exceptions: see Rules 5.2.7.3 and 10.5.6).
  - 10.5.3. If at any time during the course of fire, a competitor drops his firearm or causes it to fall, loaded or not. Note that a competitor who, for any reason during a course of fire, safely and intentionally places the firearm on the ground or other stable object will not be disqualified provided:
    - 10.5.3.1. The competitor maintains constant physical contact with the firearm, until it is placed firmly and securely on the ground or another stable object, and
    - 10.5.3.2. The competitor remains within 1 meter of the firearm at all times (except where the firearm is placed at a greater distance, under the supervision of a Range Official, in order to comply with a start position), and
    - 10.5.3.3. The provisions of Rule 10.5.2 do not occur, and
    - 10.5.3.4. The handgun is in the ready condition as specified in Section 8.1, or
    - 10.5.3.5. A self-loading pistol has the magazine removed and the slide locked open, or
    - 10.5.3.6. A revolver has the cylinder open and empty.
  - 10.5.4. Drawing or holstering a handgun within the confines of a tunnel.
  - 10.5.5. Allowing the muzzle of a handgun to point at any part of the competitor's body during a course of fire (i.e. sweeping). A match disqualification is not applicable if sweeping occurs while drawing or re-holstering a gun, provided the competitor's fingers are clearly outside the trigger guard.
  - 10.5.6. Allowing the muzzle of a loaded handgun to point uprange beyond a radius of 1 meter from a competitor's feet during drawing or re-holstering.
  - 10.5.7. Wearing or using more than one handgun at any point in time during a course of fire.
  - 10.5.8. Failure to keep the finger outside the trigger guard while clearing a malfunction where the competitor clearly moves the firearm away from aiming at targets.
  - 10.5.9. Failure to keep the finger outside the trigger guard during loading, reloading, or unloading except where specifically permitted (see Rule 8.1.2.4 and 8.3.7.1).
  - 10.5.10. Failure to keep the finger outside the trigger guard during movement in accordance with Section 8.5.

- 10.5.11. Having a loaded and holstered handgun, in any of the following conditions:
- 10.5.11.1. A single action self-loading pistol with the chamber loaded and the safety not applied.
  - 10.5.11.2. A double action or selective action pistol with the hammer cocked and the safety not applied.
  - 10.5.11.3. A revolver with the hammer cocked.
- 10.5.12. Handling live or dummy ammunition (including practice or training rounds, snap caps and empty cases), loaded magazines or loaded speed loading devices in a Safety Area, or failing to comply with Rule 2.4.1.
- 10.5.12.1. The word "handling" does not preclude competitors from entering a Safety Area with ammunition in magazines or speed loading devices on their belt, in their pockets or in their range bag, provided the competitor does not physically remove the loaded magazines or loaded speed loading devices from their retaining or storage device while within the Safety Area.
- 10.5.13. Having a loaded firearm other than when specifically ordered to by the Range Officer. A loaded firearm is defined as a firearm having a live or dummy round in the chamber or cylinder, or having a live or dummy round in a magazine inserted in the firearm.
- 10.5.14. Retrieving a dropped firearm. Dropped firearms must always be retrieved by a Range Officer who will, after checking and/or clearing the firearm, place it directly into the competitor's gun case, gun bag or holster. Dropping an unloaded firearm or causing it to fall outside of a course of fire is not an infraction, however, a competitor who retrieves a dropped firearm will receive a match disqualification.
- 10.5.15. Using prohibited and/or unsafe ammunition (see Rules 5.5.4, 5.5.6 and 5.5.7), and/or using a prohibited firearm (see Rules 5.1.10 and 5.1.11).
- 10.6. Match Disqualification - Unsportsmanlike Conduct
- 10.6.1. Competitors will be disqualified from a match for conduct which a Range Officer deems to be unsportsmanlike. Examples of unsportsmanlike conduct include, but are not limited to, cheating, dishonesty, failing to comply with the reasonable directions of a Match Official, or any behavior likely to bring the sport into disrepute. The Range Master must be notified as soon as possible.
  - 10.6.2. A competitor who is deemed by a Range Officer to have intentionally removed or caused the loss of eye or ear protection in order to gain a competitive advantage will be disqualified.

- 10.6.3. Other persons may be expelled from the range for conduct which a Range Officer deems to be unacceptable. Examples of unacceptable conduct include, but are not limited to, failing to comply with the reasonable directions of a Match Official, interference with the operation of a course of fire and/or a competitor's attempt thereof, and any other behavior likely to bring the sport into disrepute.
- 10.7. Match Disqualification - Prohibited Substances
- 10.7.1. All persons are required to be in complete control both mentally and physically during IPSC matches.
- 10.7.2. IPSC considers the abuse of alcoholic products, non-prescription and non-essential drugs and the use of illegal or performance enhancing drugs, irrespective of how they are taken or administered, to be an extremely serious offense.
- 10.7.3. Except when used for medicinal purposes, competitors and officials at matches must not be affected by drugs (including alcohol) of any sort during matches. Any person, who in the opinion of the Range Master is visibly under the influence of any of the items described herein, will be disqualified from the match and may be required to leave the range.
- 10.7.4. IPSC reserves the right to prohibit any general or specific substances and to introduce tests for the presence of these substances at any time (see separate IPSC Anti-Doping Rules).

## CHAPTER 11: Arbitration and Interpretation of Rules

### 11.1. General Principles

#### 11.1.1. Administration

Occasional disputes are inevitable in any competitive activity governed by rules. It is recognized that at the more significant match levels the outcome is much more important to the individual competitor. However, effective match administration and planning will prevent most if not all disputes.

#### 11.1.2. Access

Appeals may be submitted to arbitration in accordance with the following rules for any matter except where specifically denied by another rule. Appeals arising from a disqualification for a safety infraction will only be accepted to determine whether exceptional circumstances warrant reconsideration of the match disqualification. However, the commission of the infraction as described by the Range Official is not subject to challenge or appeal.

#### 11.1.3. Appeals

The Range Officer makes decisions initially. If the appellant disagrees with a decision, the Chief Range Officer for the stage or area in question should be asked to rule. If a disagreement still exists, the Range Master must be asked to rule.

#### 11.1.4. Appeal to Committee

Should the appellant continue to disagree with the decision he may appeal to the Arbitration Committee by submitting a first party appeal.

#### 11.1.5. Retain Evidence

An appellant is required to inform the Range Master of his wish to present his appeal to the Arbitration Committee and may request that the officials retain any and all relevant documentary or other evidence pending the hearing. Audio and/or video recordings will not be accepted as evidence.

#### 11.1.6. Preparing the Appeal

The appellant is responsible for the preparation and delivery of the written submission, together with the appropriate fee. Both must be submitted to the Range Master within the specified period of time.

11.1.7. Match Official's Duty

Any Match Official in receipt of a request for arbitration must, without delay, inform the Range Master and must note the identities of all witnesses and officials involved and pass this information on to the Range Master.

11.1.8. Match Director's Duty

Upon receiving the appeal from the Range Master, the Match Director must convene the Arbitration Committee in a place of privacy as soon as possible.

11.1.9. Arbitration Committee's Duty

The Arbitration Committee is bound to observe and apply the current IPSC Rules and to deliver a decision consistent with those rules. Where rules require interpretation or where an incident is not specifically covered by the rules, the Arbitration Committee will use their best judgment in the spirit of the rules.

11.2. Composition of Committee

11.2.1. Level III or higher Matches

The composition of the Arbitration Committee will be subject to the following rules:

11.2.1.1. The IPSC President, or his delegate, or a certified Range Official appointed by the Match Director, (in that order) will serve as Chairman of the committee with no vote.

11.2.1.2. Three arbitrators will be appointed by the IPSC President, or his delegate, or by the Match Director, (in that order), with one vote each.

11.2.1.3. When possible arbitrators should be competitors in the match and should be certified Range Officials.

11.2.1.4. Under no circumstances must the Chairman or any member of an Arbitration Committee be a party to the original decision or subsequent appeals, which led to the arbitration.

11.2.2. Level I and II Matches

The Match Director can appoint an Arbitration Committee of three experienced shooters who are not parties to the appeal and who do not have a direct conflict of interest in the outcome of the case. The arbitrators should be certified Range Officials if possible. All committee members will vote. The senior Range Official, or the senior shooter if there are no Range Officials, will be the chairman.

### 11.3. Time Limits and Sequences

#### 11.3.1. Time Limit for Appeal to Arbitration

Written appeals to arbitration must be submitted to the Range Master on the appropriate form, accompanied by the applicable fee, within one hour of the time of the disputed call as recorded by Match Officials. Failure to comply will render the appeal invalid, and no further action will be taken.

#### 11.3.2. Decision Time Limit

The Committee must reach a decision within 24 hours of the request for arbitration or before the results have been declared final by the Match Director, whichever comes first. If the Committee fails to render a decision within the prescribed period, both a first and third party appellant (see Section 11.7) will automatically succeed in their appeal, and the fee will be returned.

### 11.4. Fees

#### 11.4.1. Amount

For Level III or higher matches, the appeal fee to enable an appellant to appeal to arbitration will be US\$100.00 or the equivalent of the maximum individual match entry fee (whichever is lower), in local currency. The appeal fee for other matches may be set by the Match Organizers, but must not exceed US\$100 or equivalent in local currency. An appeal brought by the Range Master in respect of a match issue will not incur a fee.

#### 11.4.2. Disbursement

If the Committee's decision is to uphold the appeal, the fee paid will be returned. If the Committee's decision is to deny the appeal, the appeal fee and the decision must be forwarded to the Regional or National Range Officers Institute (RROI or NROI) in respect of Level I and II matches, and to the International Range Officers Association (IROA) in respect of Level III and higher matches.

### 11.5. Rules of Procedure

#### 11.5.1. Committee's Duty and Procedure

The Committee will study the written submission and retain on behalf of the organizers the monies paid by the appellant until a decision has been reached.

#### 11.5.2. Submissions

The Committee may require the appellant to personally give further details of the submission and may question him on any point relevant to the appeal.

11.5.3. Hearing

The appellant may be asked to withdraw while the Committee hears further evidence.

11.5.4. Witnesses

The Committee may hear Match Officials as well as any other witnesses involved in the appeal. The Committee will examine all evidence submitted.

11.5.5. Questions

The Committee may question witnesses and officials on any point relevant to the appeal.

11.5.6. Opinions

Committee members will refrain from expressing any opinion or verdict while an appeal is in progress.

11.5.7. Inspect Area

The Committee may inspect any range or area related to the appeal and require any person or official they regard as useful to the process to accompany them.

11.5.8. Undue Influence

Any person attempting to influence the members of the Committee in any way other than evidence may be subject to disciplinary action at the discretion of the Arbitration Committee.

11.5.9. Deliberation

When the Committee is satisfied that they are in possession of all information and evidence relevant to the appeal, they will deliberate privately and will reach their decision by majority vote.

11.6. Verdict and Subsequent Action

11.6.1. Committee Decision

When a decision is reached by the Committee, they will summon the appellant, the official and the Range Master to present their judgment.

11.6.2. Implement Decision

It will be the responsibility of the Range Master to implement the Committee's decision. The Range Master will advise the appropriate match personnel who will post the decision in a place available to all competitors. The decision is not retroactive and will not affect any incidents prior to the decision.

11.6.3. Decision is Final

The decision of the Committee is final and may not be appealed unless, in the opinion of the Range Master, new evidence received after the decision warrants reconsideration.

11.6.4. Minutes

Decisions of the Arbitration Committee will be recorded and will provide precedent for any similar and subsequent incident during that match.

11.7. Third Party Appeals

11.7.1. Appeals may also be submitted by other persons on a “third party appeal” basis. In such cases, all provisions of this Chapter will otherwise remain in force.

11.8. Interpretation of Rules

11.8.1. Interpretation of these rules and regulations is the responsibility of the IPSC Executive Council.

11.8.2. Persons seeking clarification of any rule are required to submit their questions in writing, either by fax, letter or email to IPSC headquarters.

11.8.3. All rule interpretations published on the IPSC website will be deemed to be precedents and will be applied to all IPSC sanctioned matches commencing on or after 7 days from the date of publication. All such interpretations are subject to ratification or modification at the next IPSC Assembly.

## CHAPTER 12: Miscellaneous Matters

### 12.1. Appendices

All Appendices included herein are an integral part of these rules.

### 12.2. Language

English is the official language of the IPSC Rules. Should there be discrepancies between the English language version of these rules and versions presented in other languages, the English language version will prevail.

### 12.3. Disclaimers

Competitors and all other persons in attendance at an IPSC match are wholly, solely and personally responsible to ensure that all and any equipment which they bring to the match is fully in compliance with all laws applicable to the geographical or political area where the match is being held. Neither IPSC nor any IPSC Officers, nor any organization affiliated to IPSC nor any officers of any organization affiliated to IPSC accepts any responsibility whatsoever in this regard, nor in respect of any loss, damage, accident, injury or death suffered by any person or entity as a result of the lawful or unlawful use of any such equipment.

### 12.4. Gender

References made herein to the male gender (i.e. "he", "his", "him") are deemed to include the female gender (i.e. "she", "her").

### 12.5. Glossary

Throughout these rules, the following definitions apply:

Aftermarket	Items not manufactured by the OFM, and/or bearing identifying marks of a different OFM.
Allied Equipment	Magazines, speed loading devices and/or their respective retention devices (including magnets).
Berm	A raised structure of sand, soil or other materials used to contain bullets and/or to separate one shooting bay and/or COF from another.
Bullet	The projectile in a round intended to strike a target.
Caliber	The diameter of a bullet measured in millimeters (or thousandths of an inch).
Cartridge case	The main body of a round, which contains all component parts.

Compensator	A device fitted to the muzzle end of a barrel to counter muzzle rise (usually by diverting away escaping gasses).
Course of fire	(Also “course” and “COF”) An expression used interchangeably with "Stage" (see Rule 6.1.3).
Detonation	Ignition of the primer of a round, other than by action of a firing pin, where the bullet does not pass through the barrel (e.g. when a slide is being manually retracted, when a round is dropped).
Discharge	See Shot.
Draw (Drawing)	The act of removing a handgun from it’s holster. A draw is deemed to have ended when the handgun has cleared the holster.
Dry firing	The activation of the trigger and/or action of a firearm which is totally devoid of ammunition.
Face (facing) uprange	The competitor’s face chest and toes are all facing uprange.
False start	Beginning an attempt at a COF prior to the “Start signal” (see Rule 8.3.4).
Grain	A common unit of measurement used in respect of the weight of a bullet (1 grain = 0.0648 grams).
Loading	The insertion of ammunition into a firearm.
Location	A geographical place within a course of fire.
Match Official	A person who has an official duty or function at a match, but who is not necessarily qualified as, or acting in the capacity of, a Range Official.
May	Entirely optional.
Must	Mandatory.
No-shoot(s)	Target(s) that incur penalties when hit.
Not Applicable	The rule or requirement does not apply to the particular discipline, Division or match level.
OFM	Original firearm manufacturer.
Primer	The part of a round which causes a detonation or a shot to be fired.
Prototype	A firearm in a configuration which is not in mass production and/or is not available to the general public.
Range Official	A person who is officially serving at a match in the capacity of a Range Officer (see Chapter 7).

---

Region	A country or other geographical area, recognized by IPSC.
Regional Director	The person, recognized by IPSC, who represents a Regional Directorate.
Regional Directorate	The organization recognized by IPSC, which directs the IPSC shooting activities in a Region.
Reloading	Replenishment or the insertion of additional ammunition into a firearm.
Reshoot	A competitor's further attempt at a course of fire, authorized in advance by a Range Officer or an Arbitration Committee.
Round	A cartridge of ammunition used in a handgun or rifle.
Shooting position	The physical presentation of a person's body (e.g. standing, sitting, kneeling, prone).
Shot	A bullet which passes completely through the barrel of a firearm.
Should	Optional but highly recommended.
Sight picture	Aiming at a target without actually shooting at it (see Section 8.7).
Snap Cap	(Also "spring cap") A type of dummy round.
Squib	Any part of a round lodged inside the barrel of a firearm and/or a bullet which exits the barrel at extremely low velocity.
Stance	The physical presentation of a person's limbs (e.g. hands by the side, arms crossed etc.).
Start position	The location, shooting position and stance prescribed by a COF prior to issuance of the "Start signal" (see Rule 8.3.4).
Strong Hand	The hand a person uses to initially grip a handgun when drawing it from a holster attached to their belt (the weak hand is the other hand). Competitors with only one hand can use that hand for both Strong and Weak Hand stages, subject to Rule 10.2.11.
Sweeping	Pointing the muzzle of a firearm at any part of any person's body during a course of fire while the firearm is being touched or held (see Rule 10.5.5).
Target(s)	A term that can include both scoring target(s) and no-shoot(s) unless a Rule (e.g. 4.1.3) differentiates between them.

Tie-down rig	A holster where the lower portion is secured to a competitor's leg by a strap or other means.
Unloading	Removal of ammunition from a firearm.
View	A vantage point available at a location (e.g. one of the ports, one side of a barricade etc.).
Will	Mandatory.

## 12.6. Measurements

Throughout these rules, where measurements are expressed, those in brackets are only provided as a guide.

## APPENDIX A1 IPSC Match Levels

Key: N/A = Not Applicable, R = Recommended, M = Mandatory

	Level				
	I	II	III	IV	V
1. Must follow latest edition IPSC rules	M	M	M	M	M
2. Competitors must be individual members of their IPSC Region of residence (Section 6.5)	R	M	M	M	M
3. Match Director	M	M	M	M	M
4. Range Master (actual or designated) 5. Range Master approved by Regional Directorate	M	M	M	M	M
6. Range Master approved by IPSC Executive Council				M	M
7. One Chief Range Officer per Area			R	M	M
8. One NROI official per stage	R	R	M		
9. One IROA official per stage			R	M	M
10. IROA Stats Director			R	M	M
11. One Target Restorer for each 6 rounds	R	R	R	R	R
12. COF approval by Regional Directorate	R	R	M		
13. COF approval by IPSC committee			M	M	M
14. IPSC sanctioning *			M	M	M
15. Chronograph	R	R	M	M	M
16. Three month advance registration with IPSC			M		
17. IPSC Assembly approval on three year cycle				M	M
18. Inclusion in IPSC Match Calendar			M	M	M
19. Post match reports to IROA			M	M	M
20. Recommended minimum rounds	28	75	150	300	450
21. Recommended minimum stages	2	5	8	25	36
22. Recommended minimum competitors	10	50	120	200	300
23. Match rating (points)	1	2	3	4	5

\* Point 14: Note that " " means that international sanctioning of Level I and Level II matches is not required. However each Regional Directorate is entitled to establish their own criteria and procedures for sanctioning of Level I and Level II matches held within their own Region.

# APPENDIX A2 IPSC Recognition

Prior to the commencement of a match, the organizers must specify which Division(s) will be recognized.

Unless otherwise specified, IPSC sanctioned matches will recognize Divisions and Categories based on the number of registered competitors who actually compete in the match, based on the following criteria:

## 1. Divisions

- Level I & II..... A minimum of 5 competitors per Division (recommended)
- Level III..... A minimum of 10 competitors per Division (mandatory)
- Level IV & V ... A minimum of 20 competitors per Division (mandatory)

## 2. Categories

Division status must be achieved before Categories are recognized.

All level matches ... A minimum of 5 competitors per Division Category (see approved list below)

## 3. Individual Categories:

Categories approved for individual recognition are as follows:

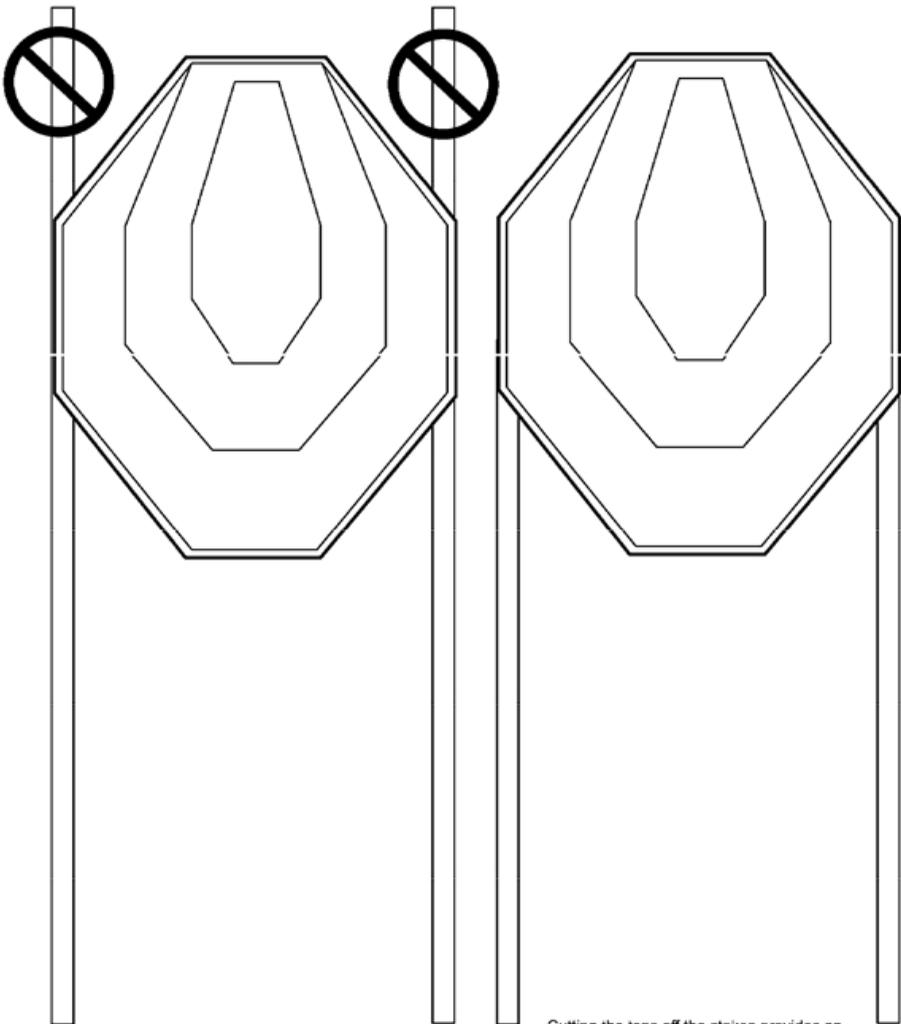

- (a) Lady
- (b) Junior .....Competitors who are under the age of 21 on the first day of the match
- (c) Senior ... .....Competitors who are over the age of 50 on the first day of the match
- (d) Super Senior .....Competitors who are over the age of 60 on the first day of the match. A competitor over the age of 60 on the first day of the match may enter Senior category only if Super Senior is unavailable.

## 4. Team Categories:

IPSC matches may recognize the following for team awards:

- (a) Regional teams by Division
- (b) Regional teams by Division for Ladies Category
- (c) Regional teams by Division for Junior Category
- (d) Regional teams by Division for Senior Category

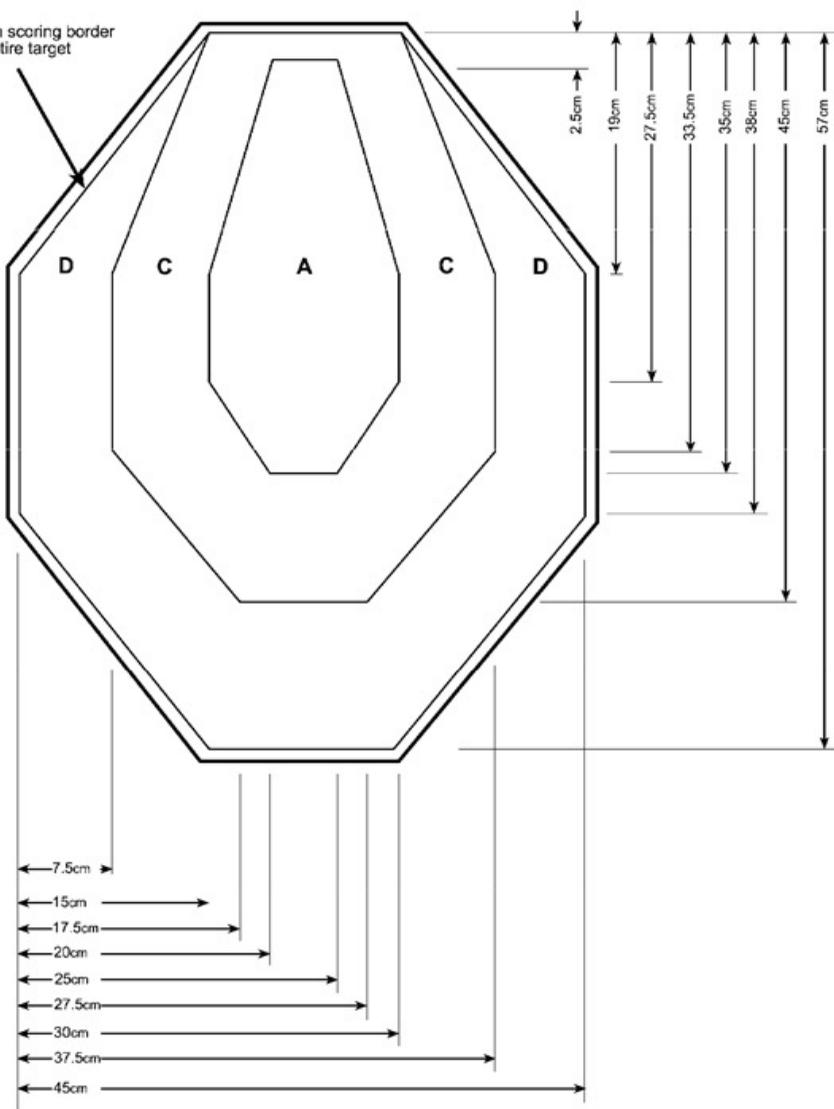

APPENDIX B1 Target Presentation

Cutting the tops off the stakes provides an improved visual appearance

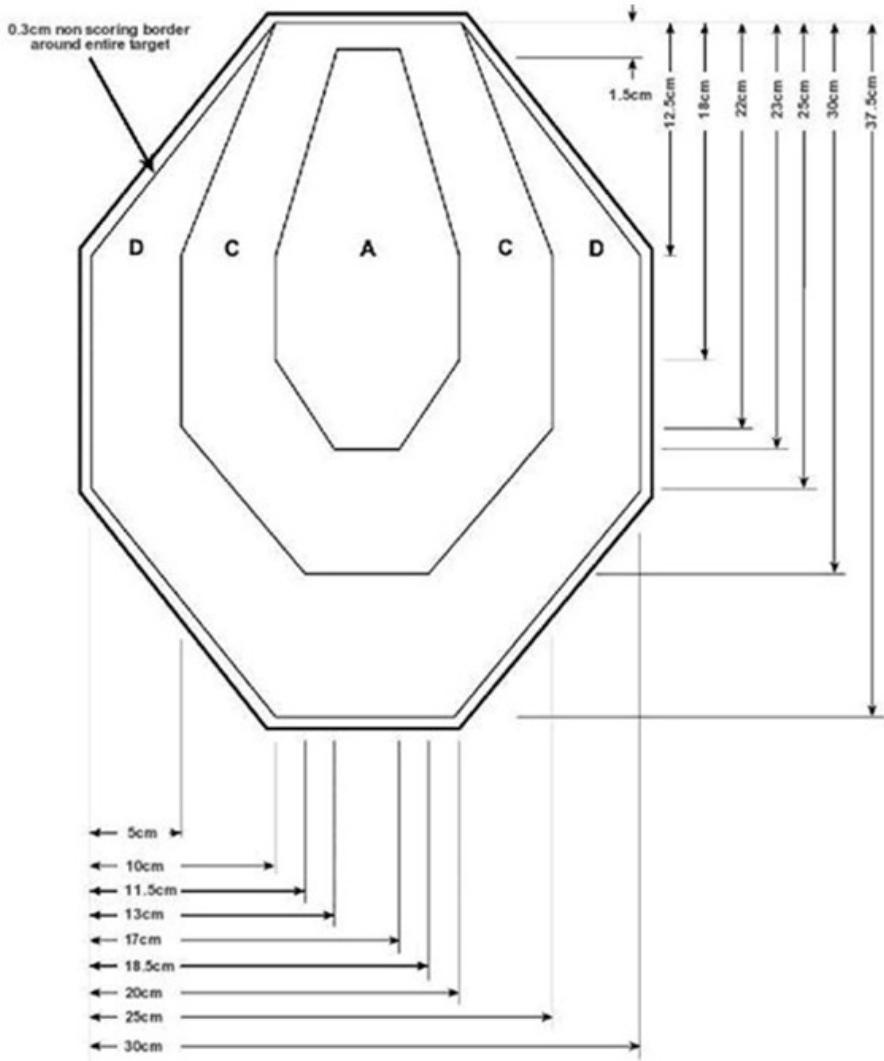

# APPENDIX B2 IPSC Target

0.5cm non scoring border around entire target

Scoring		
Major	Zone	Minor
5	A	5
4	C	3
2	D	1

# APPENDIX B3 IPSC Mini Target

Scoring		
Major	Zone	Minor
5	A	5
4	C	3
2	D	1

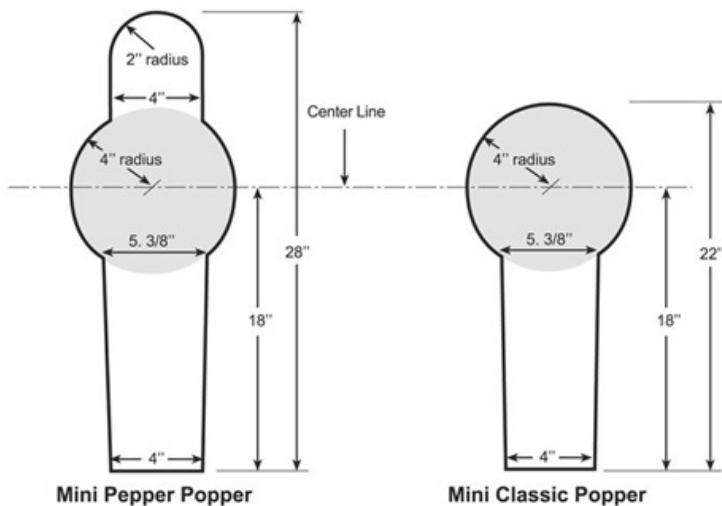

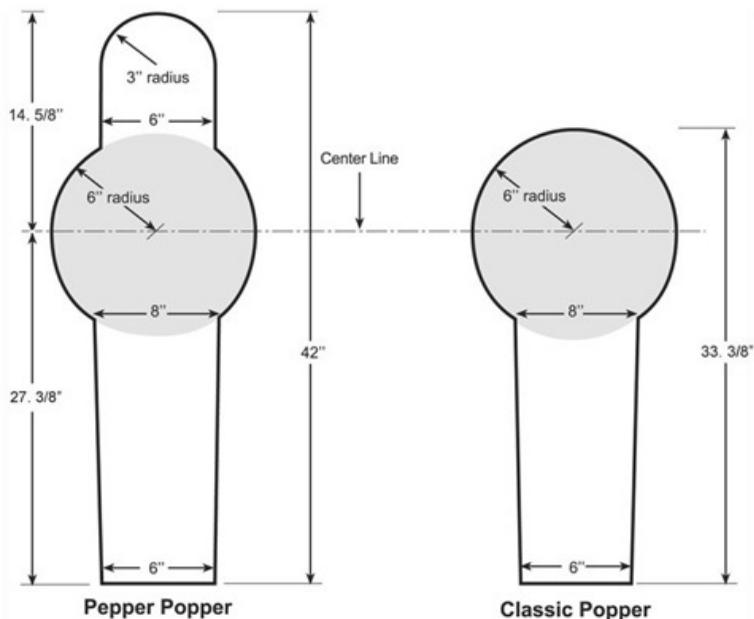

## APPENDIX C1 Calibration of IPSC Poppers

1. The Range Master must designate a specific supply of ammunition and one or more handguns to be used as official calibration tools by officials authorized by him to serve as calibration officers.
2. Prior to commencement of a match, the calibration ammunition must be chronographed using the procedure specified in Rule 5.6.2. The calibration ammunition, when tested through each designated handgun, must achieve a 125 power factor (variance +/- 5%) to qualify.
3. Once the supply of ammunition and the designated handguns have been tested and approved by the Range Master, they are not subject to challenge by competitors.
4. The Range Master must arrange for each popper to be calibrated prior to commencement of a match, and whenever required during a match.
5. For initial calibration, each popper must be set to fall when hit within the calibration zone with a single shot fired from a designated handgun using the calibration ammunition. The shot must be fired from the shooting location in the course of fire furthest from the popper being calibrated. Calibration zones are indicated in the diagrams in the following pages.
6. If, during a course of fire, a popper does not fall when hit, a competitor has three alternatives:
  - (a) The popper is shot again until it falls. In this case, no further action is required and the course of fire is scored "as shot".
  - (b) The popper is left standing but the competitor does not challenge the calibration. In this case, no further action is required and the course of fire is scored "as shot", with the subject popper scored as a miss.
  - (c) The popper is left standing and the competitor challenges the calibration. In this case, the popper and the surrounding area on which it stands must not be touched or interfered with by any person. If a Match Official violates this rule, the competitor must reshoot the course of fire. If the competitor or any other person violates this rule, the popper will be scored as a miss and the rest of the course of fire will be scored "as shot".
  - (d) If the popper falls for any external reason (e.g. wind action), before it can be calibrated, a reshoot must be ordered.

7. In the absence of any interference, a calibration officer must conduct a calibration test of the subject popper (when required under 6(c) above), from as near as possible to the point from where the competitor shot the popper, when the following will apply:
  - (a) If the first shot fired by the calibration officer hits the calibration zone and the popper falls, the popper is deemed to be properly calibrated, and it will be scored as a miss.
  - (b) If first the shot fired by the calibration officer hits the calibration zone and the popper does not fall, the popper is deemed to have failed, and the competitor must be ordered to reshoot the course of fire, once the popper has been recalibrated.
  - (c) If the first shot fired by the calibration officer hits above or below the calibration zone, the calibration test is deemed to have failed and the competitor must be ordered to reshoot the course of fire.
  - (d) If the first shot fired by the calibration officer misses the popper altogether, another shot must be fired until one of 7(a), 7(b) or 7(c) occurs.
8. Note that authorized metal plates are not subject to calibration or challenge (see Rule 4.3.1.6).

# APPENDIX C2 IPSC Popper Calibration Zones

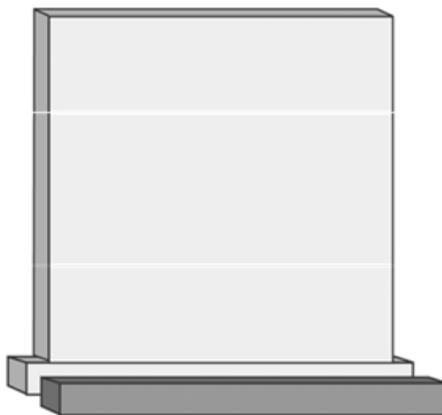

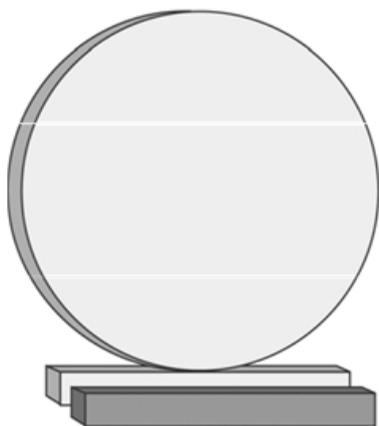

The calibration zone for each target is indicated by the shaded area.

All Poppers - Scoring value: 5 points (Minor and Major)

# APPENDIX C3 IPSC Metal Plates

Round		Square or Rectangular
20cm diameter	Minimum dimension	15cm each side
30cm diameter	Maximum dimension	30cm each side
5 points	Scoring value Minor and Major	5 points

**Construction Note**

A small block of wood (indicated by dark shading above), approximately 2cm x 2cm, and about the same width as the plate, should be affixed in front of the base of the plate, to help prevent the plate from turning sideways when shot.

## APPENDIX D1 Open Division

1.	Minimum power factor for Major	160
2.	Minimum power factor for Minor	125
3.	Minimum bullet weight	120 grain for Major
4.	Minimum bullet caliber / cartridge case length	9mm (0.354") / 19mm (0.748")
5.	Minimum bullet caliber for Major	No
6.	Minimum trigger pull (see Appendix F2)	No
7.	Maximum handgun size	No
8.	Maximum magazine length	170mm (see Appendix F1)
9.	Maximum ammunition capacity	No
10.	Max. distance of handgun and mags/speed loaders from torso	50mm
11.	Rule 5.2.3.1 applies	Yes
12.	Restriction on position of holster and other equipment	No
13.	Optical/electronic sights permitted	Yes
14.	Compensators, sound and/or flash suppressors permitted	Yes
15.	Ports permitted	Yes

### Special conditions:

16. Ammunition which fails to meet the minimum bullet weight above, but which chronographs at Major power factor, will be treated as unsafe and must be withdrawn (see Rule 5.5.6). If the weight of the first of eight chronograph testing rounds drawn from a competitor under Rule 5.6.3.2 fails to meet the minimum bullet weight required for Major power factor, Rule 5.6.3.6 will apply, and a second round will be weighed as a final and definitive bullet weight test.

<b>APPENDIX D2 Standard Division</b>
--------------------------------------

1.	Minimum power factor for Major	170
2.	Minimum power factor for Minor	125
3.	Minimum bullet weight	No
4.	Minimum bullet caliber / cartridge case length	9mm (0.354”) / 19mm (0.748”)
5.	Minimum bullet caliber for Major	10mm (0.40”) see below
6.	Minimum trigger pull (see Appendix F2)	No
7.	Maximum handgun size	Yes, see below
8.	Maximum magazine length	Yes, see below
9.	Maximum ammunition capacity	No
10.	Max. distance of handgun and mags/speed loaders from torso	50mm
11.	Rule 5.2.3.1 applies	Yes
12.	Restriction on position of holster and other equipment	Yes, see below
13.	Optical/electronic sights permitted	No
14.	Compensators, sound and/or flash suppressors permitted	No
15.	Ports permitted	No, see below

Special conditions:

16. A handgun in its ready condition (See Section 8.1), but unloaded and with an empty magazine inserted or empty cylinder closed, must fit wholly within the confines of a box which has internal dimensions of 225mm x 150mm x 45mm (tolerance of +1 mm, -0 mm). Note that all magazines must comply; failing which Rule 6.2.5.1 will apply. When a handgun is inserted into the box, rear adjustable sights may be slightly depressed, but all other features of the handgun, (e.g. collapsible and/or folding sights, slide rackers, thumb rests, external hammers, grips etc), must be fully extended or deployed. Additionally, telescoping magazines and/or magazines with spring-loaded bases or base pads are expressly prohibited.
17. Neither the handgun, nor any of its attachments, nor the holster, nor any allied equipment, can extend forward of the line illustrated in Appendix F3. Any such items a Range Officer deems not to be in compliance must be safely and promptly adjusted, failing which Rule 6.2.5.1 will apply.
18. Only porting of barrels is prohibited. Slides may be ported.
19. 357SIG is also an approved caliber for Major, subject to achieving the applicable minimum power factor. This concession has been extended until 31 December 2011.

## APPENDIX D3 Modified Division

1.	Minimum power factor for Major	170
2.	Minimum power factor for Minor	125
3.	Minimum bullet weight	No
4.	Minimum bullet caliber / cartridge case length	9mm (0.354") / 19mm (0.748")
5.	Minimum bullet caliber for Major	10mm (0.40")
6.	Minimum trigger pull (see Appendix F2)	No
7.	Maximum handgun size	Yes, see below
8.	Maximum magazine length	Yes, see below
9.	Maximum ammunition capacity	No
10.	Max. distance of handgun and mags/speed loaders from torso	50mm
11.	Rule 5.2.3.1 applies	Yes
12.	Restriction on position of holster and other equipment	Yes, see below
13.	Optical/electronic sights permitted	Yes
14.	Compensators, sound and/or flash suppressors permitted	Yes
15.	Ports permitted	Yes

### Special conditions:

16. A handgun in its ready condition (See Section 8.1), but unloaded and with an empty magazine inserted or empty cylinder closed, must fit wholly within the confines of a box which has internal dimensions of 225mm x 150mm x 45mm (tolerance of +1 mm, -0 mm). Note that all magazines must comply; failing which Rule 6.2.5.1 will apply. When a handgun is inserted into the box, rear adjustable sights may be slightly depressed, but all other features of the handgun and magazines, including collapsible and/or folding optical/electronic sights, must be in the same state of deployment as when the Start Signal is given.
17. Neither the handgun, nor any of its attachments, nor the holster, nor any allied equipment, can extend forward of the line illustrated in Appendix F3. Any such items a Range Officer deems not to be in compliance must be safely and promptly adjusted, failing which Rule 6.2.5.1 will apply.

## APPENDIX D4 Production Division (effective 1 January 2010)

1.	Minimum power factor for Major	Not applicable
2.	Minimum power factor for Minor	125
3.	Minimum bullet weight	No
4.	Minimum bullet caliber / cartridge case length	9mm (0.354") / 19mm (0.748")
5.	Minimum bullet caliber for Major	Not applicable
6.	Minimum trigger pull (see Appendix F2)	2.27 kg (5lbs) for first shot
7.	Maximum handgun size	Maximum barrel length 127mm (5")
8.	Maximum magazine length	No
9.	Maximum ammunition capacity	Yes, see Point 19.2 below
10.	Max. distance of handgun and mags/speed loaders from torso	50mm
11.	Rule 5.2.3.1 applies	Yes
12.	Restriction on position of holster and other equipment	Yes, see below.
13.	Optical/electronic sights permitted	No
14.	Compensators, sound and/or flash suppressors permitted	No
15.	Ports permitted	No

### Special conditions:

16. Only handguns approved and listed on the IPSC website may be used in Production Division.
17. Handguns deemed by IPSC to be single-action-only are prohibited. Handguns with external hammers must be fully decocked. First shot attempted must be double action. Competitors in this Division who, after the issuance of the start signal and prior to attempting the first shot, cock the hammer on a handgun which has a loaded chamber, will incur one procedural penalty per occurrence. Note that a procedural penalty will not be assessed in respect of courses of fire where the ready condition requires the competitor to prepare the handgun with an empty chamber. In these cases, the competitor may fire the first shot single action.
18. Neither the handgun, nor any of its attachments, nor the holster, nor any allied equipment, can extend forward of the line illustrated in Appendix F3. Any such items a Range Officer deems not to be in compliance must be safely and promptly adjusted, failing which Rule 6.2.5.1 will apply.

19. Original parts and components offered by the OFM as standard equipment, or as an option, for a specific model handgun on the IPSC approved handgun list are permitted, subject to the following:
  - 19.1. Modifications to them, other than minor detailing (the removal of burrs and/or adjustments unavoidably required in order to fit replacement OFM parts or components, and/or identifying marks which add or remove negligible weight to/from magazines), are prohibited. Other prohibited modifications include those which facilitate faster reloading (e.g. flared, enlarged and/or add-on magwells, etc.) changing the original color and/or finish of a handgun, and/or adding stripes or other embellishments.
  - 19.2. **Magazines accessible to a competitor during a COF must not contain more than 15 rounds at the Start Signal.**
  - 19.3. Sights may be trimmed, adjusted and/or have sight black applied.
20. Aftermarket parts, components and accessories are prohibited, except as follows:
  - 20.1. Aftermarket magazines are permitted, subject to 19.2 above.
  - 20.2. Aftermarket open sights (see Rule 5.1.3.1) are permitted, provided their installation and/or adjustment requires no alteration to the handgun.
  - 20.3. Aftermarket grips which match the profile of the OFM standard for the approved handgun and/or the application of tape on grips (see Appendix F4) is permitted, however, rubber sleeves are prohibited.
21. A competitor who fails to comply with any of the requirements above will be subject to Rule 6.2.5.1.

## APPENDIX D5 Revolver Standard Division

1.	Minimum power factor for Major	170
2.	Minimum power factor for Minor	125
3.	Minimum bullet weight	No
4.	Minimum bullet caliber / cartridge case length	9mm (0.354") / 19mm (0.748")
5.	Minimum bullet caliber for Major	No
6.	Minimum trigger pull (see Appendix F2)	No
7.	Maximum handgun size	No
8.	Maximum magazine length	Not applicable
9.	Maximum ammunition capacity	No, see below.
10.	Max. distance of handgun and speed loaders from torso	50mm
11.	Rule 5.2.3.1 applies	Yes
12.	Restriction on position of holster and other equipment	No
13.	Optical/electronic sights permitted	No
14.	Compensators, sound and/or flash suppressors permitted	No
15.	Ports permitted	No

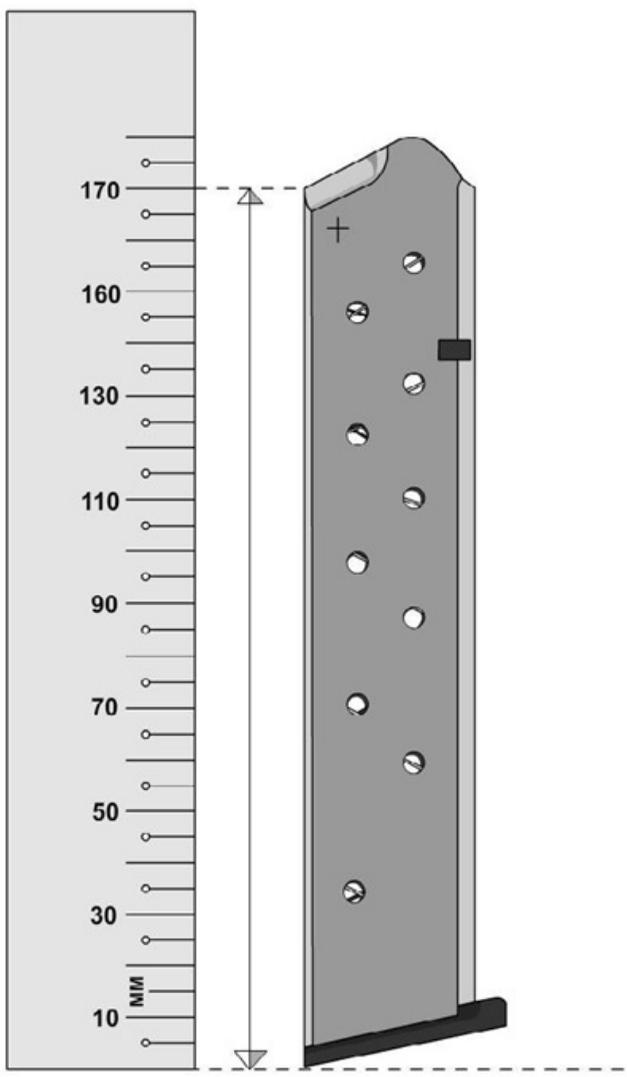

### Special conditions:

16. No limit on cylinder capacity, however, a maximum of 6 rounds to be fired before reloading. Violations will incur one procedural penalty per occurrence.
17. Any complete revolver (or a revolver assembled from components), produced by an OFM and available to the general public (except prototypes) is permitted.
18. Modifications such as weights or other devices to control and/or to reduce recoil are prohibited.
19. Modifications which are permitted are limited to:
  - 19.1. Replacement of, or modification to, sights, hammers and cylinder releases;
  - 19.2. Replacement barrels, provided the barrel length, weight and profile are the same as the OFM standard;
  - 19.3. Cosmetic enhancements which do not give a competitive advantage (e.g. plating, checkering of frames, custom grips);
  - 19.4. Chamfering and/or modifications to the cylinder to accept "Moon Clips".
  - 19.5. Replacement springs, trigger stops and other modifications to enhance the operation of the trigger.
20. "Self-loading" revolvers with retractable slides are prohibited in this Division.

APPENDIX F1 Magazine Measurement Procedure

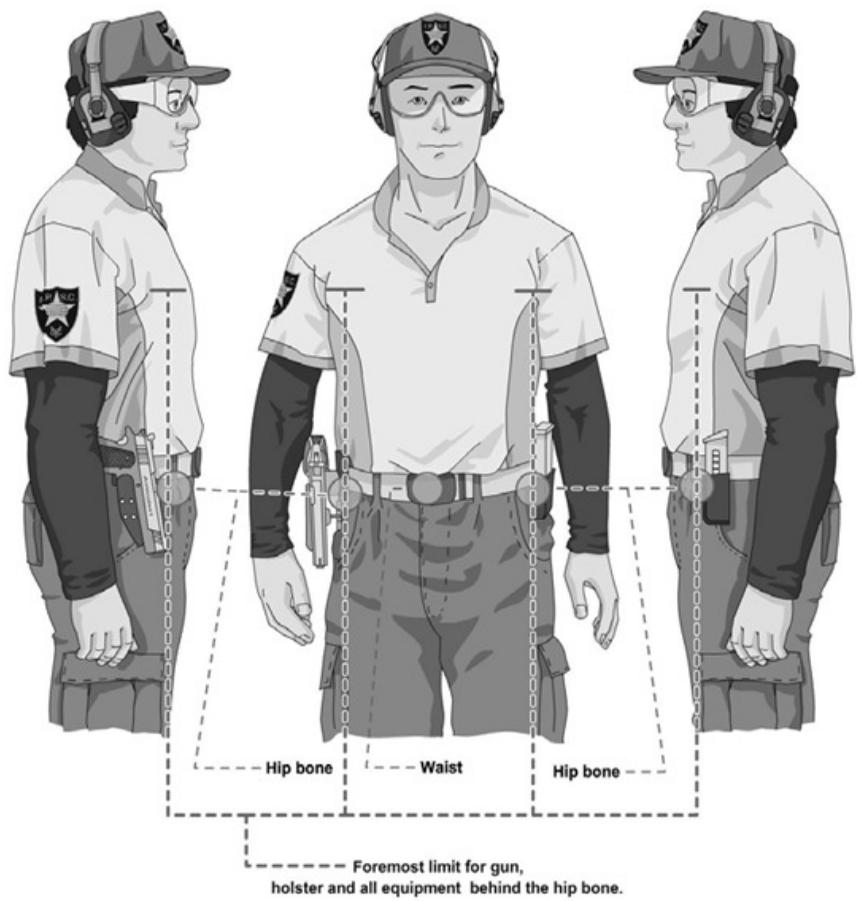

## APPENDIX F2 Trigger Pull Testing Procedure

When a minimum trigger pull is required by a Division, handguns will be tested as follows:

1. The unloaded handgun will be prepared as if the handgun is ready to fire a double action shot;
2. The trigger weight or scale will be attached as closely as possible to the center of the trigger face;
3. The trigger of the handgun must either:
  - (a) Raise and hold a 2.27 kg (5lbs) weight when the muzzle of the handgun is pointed vertically skywards and the handgun is gently raised, or
  - (b) Register not less than 2.27 kg (5lbs) on a scale using the procedure specified by the Range Master;
4. One of the above tests will be conducted a maximum of 3 times;
5. If the hammer or striker does not fall on any 1 of the 3 attempts in 3(a) above, or if the scale registers not less than 2.27 kg (5lbs) in 3(b) above, the handgun has passed the test.
6. If the hammer or striker falls on all three (3) attempts in 3(a) above, or if the scale registers less than 2.27 kg (5lbs) in 3(b) above, the handgun has failed the test and Rule 6.2.5.1 will apply.

APPENDIX F3 Diagram of Equipment Position

## APPENDIX F4 Production Division - Boundaries of Tape on Grips

The maximum surface area to which tape can be applied in a single layer (unavoidable minor overlapping permitted), is illustrated in the diagrams below:

Tape can only be applied within areas indicated by the dotted lines, which includes the front and rear backstraps. However tape cannot be used to disengage a grip safety, nor can tape be applied to any part of the slide, trigger, trigger guard, magazine or on any lever or button.
